

SHI's **Cloud Optimization Assessment** focuses on the architecture and governance changes required to embrace the dynamic pricing and scalability models of the cloud.

Save up to 30%

Our Cloud Optimization Assessment centers on the largest cost-driving components of your architecture and governance.

Architecture

Compute, storage and network optimization, including leveraging automation and refactoring to utilize services such as Spot, Batch, RDS and Serverless.

Governance

Gain improved visibility and insight to stay ahead of future optimization efforts, including tagging, account structure, alerts, reports, policies and licensing.

CLOUD OPTIMIZATION ASSESSMENT BENEFITS

- Accelerate cost savings in the cloud
- Certified Cloud Architect insight and suggestions
- Improve future resource planning

DELIVERABLES

- A detailed and actionable report of findings delivered by our Certified Cloud Architects
- Proposed SHI-provided remediation and action steps prioritized based on cost estimates

SHI's Cloud Optimization Assessment focuses on the architecture and governance changes required to embrace the dynamic pricing and scalability models of the cloud.

Our Multi-Point Assessment includes:

Reserved Instances

Examine current cloud services in use for the purchase of reservations.

Licensing

Review Microsoft, Oracle or third-party licensing for savings related to BYOL.

Unused Instances

Identify instances running with zero usage.

Unused Waste

Identify unused services such as Storage, IPs and Snapshots.

Rightsizing

Recommend new instance sizes using CPU and memory on utilization metrics.

Advanced Rightsizing

Additional rightsizing including read / write capacity units.

Network Optimization

Review egress and WAN optimization.

Auto-Scaling

Deployment of servers into auto-scaling groups.

ADDITIONAL ASSESSMENT BEST PRACTICES

- Auto Start / Stop
- Batch Optimization
- Leverage CDN
- Low Priority / Burstable Instances
- PaaS
- Storage Optimization
- Instance Optimization
- Region Optimization
- *And more!*
