

The Missing Piece in Converged, Hyperconverged, and Integrated IT Solutions

Converged infrastructures are high-value investments which will deliver ROI in the form of reduced risk and increased efficiency over the course of their lifetimes. For even greater efficiencies, speeding deployment means pre-racking and shipping these systems. Loss or damage to even a single rack can run up to a million dollars or more. The missing piece in a converged solution is an intelligent infrastructure that ensures safe shipping and fast deployment, to protect the IT investment and time to market.

All-in-one Hyperconverged

fully converged physical IT infrastructure with rack, PDU, UPS, and security/environmental monitoring

Safe Shipping, Fast Deployment, and Enhanced Solutions with Cisco + APC by Schneider Electric

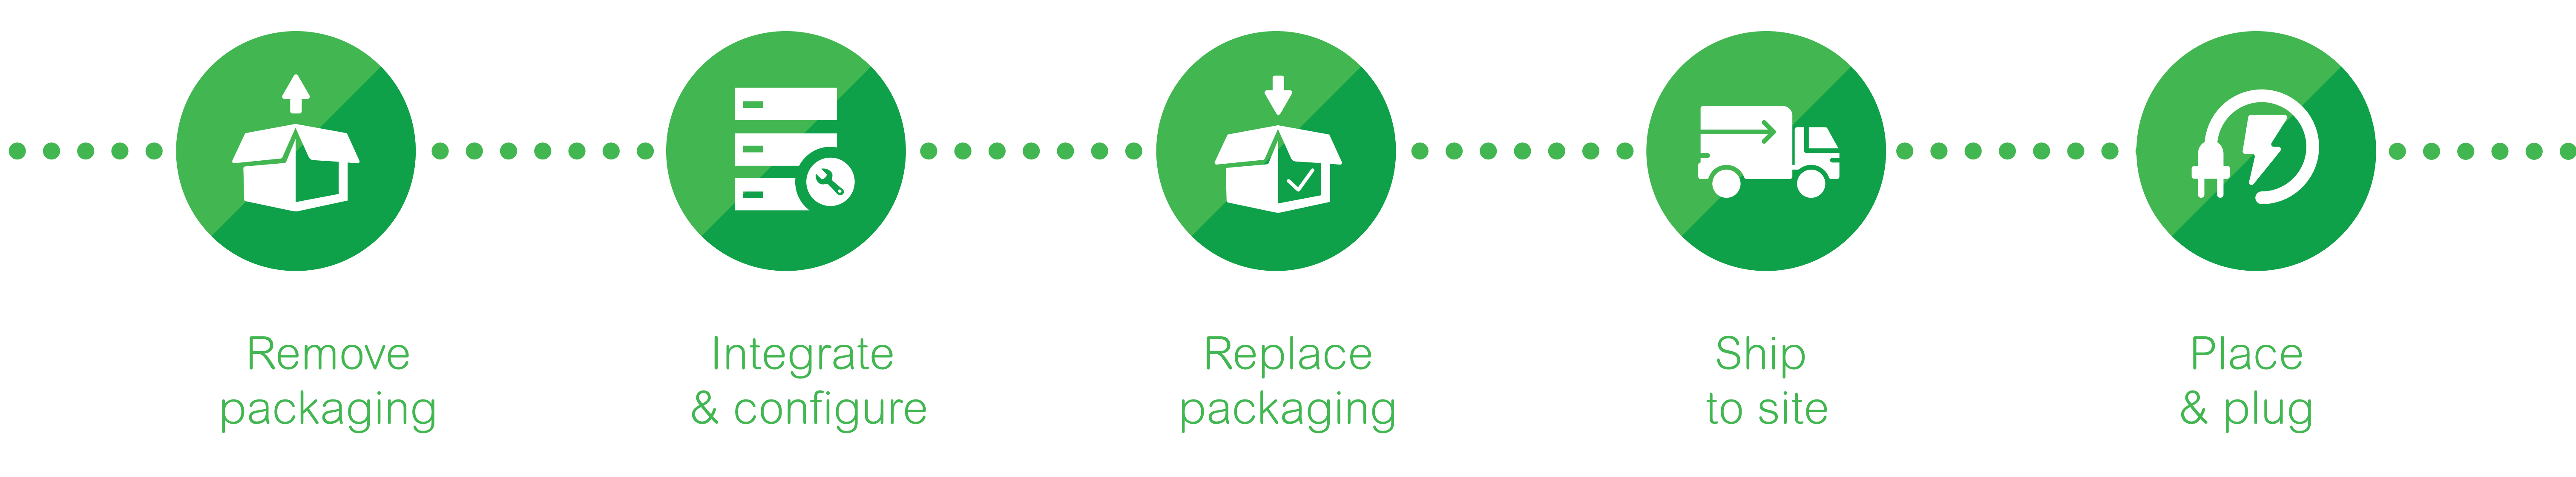

Cisco and APC by Schneider Electric deliver a pre-validated shipping solution that allows complete integration and safe shipping of Cisco UCS to your site or a colocation site for immediate plug-and-play—no added installation, setup, or downtime.

- Risk-free transport
- Fast deployment
- Better system infrastructure flexibility without impacting time to market
- Expanded solutions offerings for greater customer satisfaction and profitability.
- Outage prevention with intelligent monitoring, managing, and controlling of the integrated solution

Who is APC? Certainty in a Connected World

As the demand for data and accessible information continues to become more critical to businesses, IT professionals are facing challenges and opportunities in their businesses and technology solutions. APC by Schneider Electric creates solutions that help IT professionals anticipate and protect their most valued assets: information and data. As the industry leader in integrated physical infrastructure and software, APC creates reliable solutions that provide Certainty in a Connected World.

How does it work?

Safely load, transport, unload, and deploy a cabinet with up to 2,000 lb. (907 kg) of IT equipment installed!

- Leverage converged & hyperconverged reference designs or Micro Data Center Xpress bundled offer
- Tried and tested NetShelter SX IT cabinet platform with over 10 years and one million units sold
- Available globally as standalone or converged system solution
- Tested to latest ISTA 3E shipping standards
- Certified to Cisco's high shipping and transportation standards
- Impact- & vibration-resistance during integration/transport

Added features:

- Easy installation, integration, configuration – Easy-to-remove/reassemble shock packaging
- Added load support – Robust equipment fastening system
- Smooth maneuverability – Durable, heavy-duty casters
- Complete rack stability – Cabinet elevation/pallet brackets
- Safe cabinet removal – Onboard ramp, built-in rails, & fixed rear casters
- Outer protection – Complete outer wrap & protective inserts
- Flexible sizing – Multiple sizes for high-density applications

Why APC?

APC's proven industry leadership and collaborative technology provide integrated solutions for the transformation of IT. With the largest community of IT partners, these solutions enable connectivity, reliability, and accessibility through simplified delivery and expert services.
