

MEDICAL-GRADE **POWER PROTECTION**

INTRODUCING MEDICAL-GRADE UPS SYSTEMS

CyberPower Medical-Grade UPS Systems deliver clean, consistent backup power to sensitive medical equipment in hospitals and healthcare facilities.

Designed for use in patient care vicinities, CyberPower Medical-Grade UPS Systems meet UL 60601-1 testing requirements, and include hospital-grade outlets and plugs. These units feature built-in isolation transformers to minimize current leakage and eliminate line noise, tip-resistant designs, replaceable batteries, spray-resistant LCD panels and remote management capabilities on select models.

All CyberPower Medical-Grade UPS Systems are covered by three-year warranties (including the batteries) and \$400,000 connected equipment guarantees.

TESTED TO UL 60601-1 FOR PATIENT CARE

Featuring hospital-grade outlets and a hospital-grade plug, these units have been tested to meet UL 60601-1 requirements necessary for use in patient care environments. This testing allows the unit to be used within six feet of a patient – also known as the patient care vicinity.
