

CHALLENGES YOU MIGHT BE FACING

HOW WE CAN HELP

How do I get the majority of my people up and productive ASAP, delivering the applications they need to where they are today?

ProDeploy in the Unified Workspace

Ship preconfigured laptops/desktops directly to remote workers from Dell factory with minimal work from IT (saving up to a week of IT time per 1000 devices deployed)

Enable secure access to business apps and data on user's 'bring your own' device or corporate-managed laptop/desktop with Workspace ONE

How do I enable critical remote workers who need powerful workstations or who handle highly sensitive information?

VDI (Virtual Desktop Infrastructure) delivers secure, remote access to desktop and applications.

Quickly deploy with Ready Solutions for VDI on Dell EMC VxRail hyperconverged infrastructure

With VMware Horizon running on Dell Technologies Cloud Platform, or public cloud partners with Horizon on Microsoft Azure™ or Amazon Web Services™

How do I extend my security profile to these endpoints which are now in new locations?

Deploy new laptops and upgrade existing laptops with a security solution that prevents threats, gives you actionable insights, and helps you operate faster and more effectively with Carbon Black Security Cloud

How do I ensure critical workers get the network performance they require?

Dell EMC SD-WAN Solution powered by VMware delivers a high-performance, reliable home or branch access to cloud services, private datacenters, and SaaS-based enterprise applications without burdening the corporate network

How do I enable IT to meet infrastructure growth demands when datacenters may not have people onsite to deploy new hardware?

Deploy on-premises infrastructure rapidly with Dell Technologies Cloud or migrate on-premises workloads to VMC on Amazon Web Services™ with no application refactoring required.
