Easily collaborate within the context of your creative tools.
Creative Cloud collaboration features make it easier than ever to create across teams and devices and keep everyone in sync. Creative Cloud Libraries help you collect, organize, share, and re-use creative assets across apps and teams. Cloud documents enable you to easily work across the web, desktop, devices, and your favorite Creative Cloud apps. Invite others to collaborate on cloud documents, and work smarter by having access to version history for up to 180 days. And once your designs and creations are ready for review, share a link with your team members, stakeholders, or clients—they can review and comment even if they don't have a paid Creative Cloud membership.

Work securely and control with confidence.
Your IP and creative content are encrypted both in transit and at rest, ensuring your data is always protected. Intuitive administration tools help you maintain visibility and control over your organization's licenses and data, while policy and permission settings enable you to manage installs or empower license holders to manage on their own with self-service settings. Not only does the Adobe Admin Console allow organizations to ensure compliance and retain control, but plugin management also empowers enterprises to scale extensibility.
