# Adobe Document Cloud
for SharePoint, OneDrive, and Office 365

Do more with enterprise PDF tools, built right into Microsoft 365

Give users time-saving PDF tools and seamless workflows with Acrobat DC inside Microsoft SharePoint and OneDrive for Business. It's easy to deploy and manage; it's integrated with Office 365 cloud security and Azure Active Directory; supports single-sign-on; and it's built into SharePoint and OneDrive. Which means you can pick up your work where you left it — on any device.

Users can also create high-quality PDFs, add passwords, then save them to the cloud directly from Office 365 Online, Mac, Windows, and iOS clients.

IT benefits

Simplified IT deployment.
Adobe's embedded web experience works with Microsoft's Office 365 Admin tools, allowing central deployment and management. No need to install software on desktops.

Leverage your existing investment in Office 365.
Our integrations tie into Microsoft cloud storage. Your business-critical documents stay within a secure cloud, and don't need to be downloaded to laptops—so you won't have older cached documents living on unsecure laptops.

CAPABILITIES INCLUDE:

View, search, and collaborate in PDFs online with Adobe's web-based PDF previewer.

View and add annotations on PDFs using drawing tools, sticky notes, highlights, and markup.

Easily fill out PDF forms by typing text into fields.

Create high-quality PDFs that preserve fonts, formatting, and layouts.

Modify and organize existing PDFs with the available delete, reorder, and rotate capabilities.

Combine multiple file types including PDF, Microsoft Office, image, text, and Adobe design into one that you can use for archiving or distribution.

Export PDFs into editable Microsoft Word, Excel, PowerPoint, or RTF files while preserving fonts, formatting, and layouts.
