Enhanced UX for Apple
Identify challenges. Streamline Processes. Improve results. with SHI & Tigerspike

Why Tigerspike
Tigerspike is a global mobility partner that delivers world class mobile experiences to customers across all verticals. By partnering with SHI, Tigerspike helps develop end-to-end solutions that solve your most complex business challenges, all on Apple devices.

Business Problems Solved
Businesses that struggle with identifying bottlenecks in processes or prioritizing multiple business challenges — who have made investments in employee experiences but are not seeing the desired results. And organizations struggling to understand their users, their business, and how

Catalyst Ignition
An interactive workshop, ride-along and design sprint that builds stakeholder alignment around a specific business problem.
Catalyst delivers targeted outputs designed to help stakeholders move the initiative forward.

Product Review
A user experience and technology review that identifies challenges with a current product or solution.
Product Review delivers a prioritized roadmap of recommended improvements.

Research & Validation
A research engagement designed to ensure the customer understands who a product is for or who they are competing against.
Research delivers evidence to validate the direction of a specific initiative or product.
