You’re more than a serial number to us. That’s why we’re retiring our plans based on serial numbers and launching new plans based on people. Starting May 7, 2020, you’ll be able to trade in your standalone maintenance or network maintenance plan; starting August 7, 2020 you’ll be able to trade in your multi-user subscription at a cost consistent with what you pay today.

10 REASONS: our shift to plans centered around people is the best way to discover what’s possible.

1. The named user model is a better fit for today’s business practices, streamlining administrative work.
2. New plan options provide a range of administrative, support, control and reporting to fit the size and needs of your business.
3. You have 1:1 software access, so your employees always have the tools they need when they need them, avoiding downtime when all licenses are in use.
4. You can see usage frequency by product and version, allowing you to optimize your licensing costs.
5. You can use view usage frequency by product and version, allowing you to optimize your licensing costs.
6. In the future, you’ll get insights to analyze collaboration data and find new ways to make your team more productive.
7. Security features, such as two-factor authentication in a standard plan or multi-user access in a premium plan, keep your design data safe.
8. Keep your costs consistent with what you pay today, get more value, and get an ongoing discount to 2028*
9. Replace the need for tracking serial numbers with an efficient cloud based license management approach.
10. TRADE-IN OFFERS: If you have a multi-user subscription at your first renewal only, after August 7, 2020 trade in one seat for two standard subscriptions for one named user each, at a cost consistent with what you pay today.

For current standalone or network maintenance plans, at your first renewal before May 7, 2021 you can trade in one standalone or network maintenance seat for one standard subscription (trade in standalone and get single-user access, trade in network and get multi-user access) at a price similar to what you’re paying in 2019 for maintenance. After trade-in, network maintenance plan customers will also have an opportunity to take advantage of the multi-user trade-in at their next renewal after August 7, 2020.

*The renewal SRP for standard subscriptions obtained through this offer will increase by no more than 5% in 2021, 2023, 2025, and 2027 – with no changes in SRP for 2022, 2024, 2026 and 2028. Savings of 3-year subscriptions is compared to 1-year subscriptions. Benefits and offers may vary by country.
