Cloud Content Management

What you need to know

Businesses today are facing unprecedented disruption due to digital transformation. As competition increases and markets change faster than ever, companies are realizing that they need to find new ways to enable employees in the digital workplace and to further digital business processes. At Box, we help companies perform at their best in the digital age with Cloud Content Management (CCM).

With Cloud Content Management, companies can bring together all of their people, content and processes to transform the way they work. With Box, you can transform the way collaboration and business processes work across your extended enterprise, with all the security, data governance, compliance and IT controls needed to handle sensitive data for any industry and geography. At the same time, you have the ability to embed secure, compliant content management capabilities into custom apps for employees and customers so you can innovate rapidly and efficiently.

Here are some of the key areas where Cloud Content Management can make a difference for your business:

Digital workplace

- Secure file sharing
- External and team collaboration
- Mobile and field productivity
- Team workflow
- Network file share replacement

Digital business

- Modern records management
- Simplified digital asset management
- Secure document vaults and portals
- Content ingestion and document workflow
- Custom apps and digital experiences
