

CylanceGUARD™

24x7 Managed Detection and Response

CylanceGUARD is a 24x7 managed detection and response offering that provides actionable intelligence for customers to prevent threats quickly, while minimizing alert fatigue without requiring additional resources. Using the same expertise and methods as the BlackBerry Cylance incident response team, analysts from Cylance or one of our strategic partners, hunt through customer environments to find and contain threats, prevent major breaches and allow organizations to mature their security program.

BlackBerry Cylance has the strategy, expertise, and technology to analyze and guard an organization by preventing and containing threats as well as large scale breaches.

CylanceGUARD Components

Benefits:

Discover Threats in No Time

- Leverage our native AI platform 24X7 to detect known and zero-day threats
- Receive detailed and actionable threat intelligence whenever and wherever

Respond to Threats in No Time

- Implement effective counter-measures quickly
- Limit the impact of a breach

Implement in No Time

- Your CylanceGUARD subscription includes our award-winning native AI platform onboarded by an expert team of ThreatZERO consultants.

Key Features:

Transparent, Proactive Threat Hunting

- Automatically validate and triage alerts
- Collating forensic data and converting alert noise into threat intelligence

Customized Mobile Visibility and Interaction

- Orchestrate alert notifications and analyst interactions
- Defined escalation tiers with an online portal and mobile app

Automated, Rapid Response

- Respond dynamically to changes in the environment
- Assess indicators of compromise and initiate responses

CylanceGUARD and CylanceGUARD Advanced both leverage Cylance AI Platform with the pre-execution abilities of CylancePROTECT® and the post-execution of monitoring and blocking associated with CylanceOPTICS™.

CylanceGUARD Advanced is a 24x7 comprehensive managed detection and response offering to monitor and manage customer threats that also provides closed-loop communications, access to a BlackBerry Cylance analyst to help navigate incidents and provide regular updates on the overall threat prevention status.

CylanceGUARD is a 24x7 managed detection and response offering to help monitor and manage customer threats from alert to closure through email and mobile interactions with analysts.

About BlackBerry Cylance

BlackBerry Cylance develops artificial intelligence to deliver prevention-first, predictive security products and smart, simple, secure solutions that change how organizations approach endpoint security. BlackBerry Cylance provides full-spectrum predictive threat prevention and visibility across the enterprise to combat the most notorious and advanced cybersecurity attacks, fortifying endpoints to promote security hygiene in the security operations center, throughout global networks, and even on employees' home networks. With AI-based malware prevention, threat hunting, automated detection and response, and expert security services, BlackBerry Cylance protects the endpoint without increasing staff workload or costs.
