The Power of Audio

EPOS
Enterprise Solutions

Unleash Your Potential and Achieve More

EPOS delivers high-end audio solutions designed for enterprise and gaming.

Based on pioneering audio technology, we strive to unleash human potential by perfecting audio experiences and delivering innovative design and performance with all of our audio solutions.

Our headquarters is located in Copenhagen, Denmark, and is a key hub for our business. EPOS builds on more than 115 years of experience in audio innovation. Today, we operate in a global market with offices and partners in more than 30 countries.

Our name, EPOS is derived from Latin and ancient Greek and is used to describe epic stories, speech and poetry. The name encapsulates our dedication to create solutions that enable ways of communication through the power of audio.

EPOS is part of the Demant group – a world-leading audio and hearing technology group that offers solutions and services to help people connect and communicate with the world around them. The Demant Group operates in a global market with companies in more than 30 countries, employs more than 14,000 employees, and generates an annual revenue of DKK 14 billion.

Unbeatable Audio for All

At EPOS, our mission is to deliver excellent audio experiences and enable exceptional user performance, so individuals and teams can reach their goals and achieve more.

Every model we offer delivers rich and natural audio, with EPOS innovations that filter out unwanted noise, clarify speech, and deliver

an enhanced audio experience for both speaker and listener. Our products increase productivity and efficiency, while decreasing distractions, and delivering an excellent customer experience. At the end of the day users are at the core of our business, so when they're succeeding, we are too.

ADAPT 600 Series

IMPACT 5000 Series

EXPAND 30 Series

Pioneering Audio Technology

With an innovative mindset and a passion for technology, we are the ones who transform ideas into better audio solutions for the businesses of the world of today.

We do this by looking at audio holistically and by engineering all the small, albeit important, details – like software algorithms and microchips, and

speakers and microphones – to make premium products that reinvent the way you work.

For our users, this means being able to trust our audio tools to perform and take their day-to-day communication one step further, while staying at the forefront of what is technically possible and keeping their needs in focus, always.

Crafted to Last – Designed to Excite

Our headsets are specifically designed for those who demand professional excellence from the products they use.

Which is why all of our products are crafted with the highest quality materials, meaning they not only feel great, but they are built to last even in the toughest office environments. Providing the perfect balance of excellent

sound and soft materials, users can enjoy our headsets day in, day out, ensuring comfort, ease and style, all year round.

We keep designs minimalistic by eliminating any unnecessary components, while still ensuring our products deliver the exact functionalities needed.

Tools for Success

When Talk Matters

ADAPT

Work Your Way

IMPACT

When Talk Matters

Whatever your line of business, clear and seamless communication is essential for excellence. And in a world where 40 percent* of professionals spend long durations on the phone, and where noisy and open work environments are the norm, this proves even

more important. It's for this reason that our products are designed and crafted with superior materials that filter out unwanted noise, clarify speech and are fully compatible with all your devices and systems. So you get perfect communication, every single time.

ADAPT

Work Your Way

Modern workplaces are evolving every day – becoming more mobile, more versatile and more flexible – which is why for some, a personal headset is not just a preference, but a necessity. And since 25 percent* of all professionals spend more than half of their day away from

their desk, our solutions enable perfect concentration and collaboration, anytime and anywhere. Whether in the office, open workspaces, at home or on the go, we offer best-in-class audio quality that can adapt to any situation.

EXPAND

Seamless Collaboration

As collaboration becomes increasingly important for businesses around the world – with businesses adjusting to the reality of the hybrid workplace – the quality and reliability of speakerphones and video conferencing solutions is more essential than ever. Which is why we create both audio and video devices for professionals who prioritize intuitive,

seamless collaboration over anything else. Whether in large meeting rooms, smaller huddle spaces or simply on-the-go, our products are designed and crafted for clear conversation, sharp video quality, ease-of-use and perfect connectivity with all your devices – so you can turn any room into a meeting room.

EXPAND 20 Series

EXPAND Capture 5*

Empower Teams With Microsoft Teams Rooms

EXPAND Capture 5 is the first intelligent speaker from EPOS that is certified for Microsoft Teams Rooms. The certification covers up to 10 participants in small to medium sized meeting rooms. EXPAND Capture 5 empowers all meeting participants to engage equally whether working remotely or in the office.

It automatically transcribes your meetings for a richer collaborative meeting experience. The premium EPOS speaker driver and 7-microphone array deliver superior audio and voice recognition of every participant. Furthermore, the advanced voice recognition brings Cortana Voice Assistant into the room for more productive and conclusive meetings.

* Only for Microsoft Teams Rooms on Windows compute unit

Empower Your Meeting Room

Welcome your remote colleagues into the meeting room with intelligent video conferencing equipment. The EXPAND Vision 3 Series keeps everyone in the picture and ensures their voices are heard. Enjoy video conferencing as it should be – easy and ready to go when you are.

EXPAND Vision 3 Series

All-in-one Video Conferencing Solutions

The hybrid workplace demands solutions that bring us closer. The EXPAND Vision 3 Series sets a new standard in connecting professionals through enabling simple, effective video

collaboration. Unleash the potential of your entire team with sharp, intelligent video conferencing solutions. Simple to set up, simple to install.

“EPOS came out on top in key areas of our testing, often by a fair margin. Comfort was a key criteria... We also decided to look at the technology used in the build of the product... Battery life was a very big factor for us and environmental considerations, including packaging...”

Ben Thomas
Project Manager for the Environment Agency

“At the end of our thorough selection process, EPOS headset solutions came out on top.”

Joep Kaiser
Facility Manager
Transcom

Transcom

“The headsets are robust and provide clear sound quality. The flexibility they provide while being able to take calls away from your desk is brilliant. The battery life is exceptional and a full charge can keep you going all day.”

Sejal Patel
Project Coordinator
KNIGHT FRANK

“I think we underestimate how fatiguing it is to try and ignore competing noises while focusing on your job. Now I can use my efforts on the task in hand and don't have to spend energy filtering out disturbances. I think that's what made the biggest impression on me.”

PEOPLE FIRST

Choosing the Right Audio or Video Solution

What Solution do You Need?

IMPACT Line

Headset solutions for professionals working in energetic call center and office environments, spending many hours at or around their desks talking with customers.

ADAPT Line

Headset solutions for professionals working away from their desks, participating in meetings or calls or working remotely from other locations.

EXPAND Line

Flexible, plug-and-play, audio and video conferencing solutions for professionals working collaboratively with in-room and remote participants.

What Device do You Use?

You need your devices to work seamlessly with your headset, speakerphone, or video collaboration bar. It's that simple. All our audio and video solutions are designed for seamless compatibility. For headsets, check our headset compatibility guide at: eposaudio.com/compatibility

Softphone/PC - Connection via USB/USB-C cable or USB dongle (Bluetooth®) to Microsoft Windows or Apple Mac OS.

Screen/monitor - Connection via HDMI or USB-C display port.

Desk phone - Connection with multiple types of cables via Easy Disconnect.

Mobile phone/tablet - Connection via Bluetooth® or 3.5 mm jack cable.

Telecoil - Works with standard telecoil-equipped hearing aids.

Microsoft Teams Rooms - Only for Microsoft Teams Rooms on Windows compute unit.

How Noisy is Your Workplace?

In busy workplaces noise-canceling microphones are vital so that your caller can hear you clearly. EPOS Voice™ technology makes sure your voice is heard in challenging sound environments.

Low noise environment
Omni-directional microphone.

Medium noise environment
Noise-cancelling microphone.

High noise environment
Ultra noise-cancelling microphone.

What size is your meeting room?

The size of your meeting room determines the conferencing solution you need. EPOS has a range of speakerphones and video collaboration bars that have been designed for different meeting setups including personal workspace, huddle rooms, and small, medium, and large-sized meeting rooms.

Single or Double-sided Headsets?

Single-sided
Ideal for situations where you need to both hear your caller clearly and pay attention to what's going on around you.

Double-sided
Delivers calls in quality sound while reducing background noise - ideal for contact centers, where you need to focus solely on your caller.

Unified Communications

UC optimized

Our Sound Technologies

Innovation You Can Hear

EPOS Technology

We divide our technologies into 3 subcategories: EPOS AI™, EPOS Sound™ and EPOS Voice™ to ensure a clear understanding of our technical spectrum at all ends. Our technologies span over the range of Artificial Intelligence to Sound Experience and Microphone Performance.

EPOS AI™ – Creates an optimized audio experience

Through our commitment to exploring the Power of Audio we have developed an optimized audio experience that pushes your communication further and boosts your ability to succeed. With our user in mind, we implemented EPOS AI™ – a machine learning system embedded in EPOS audio devices that processes audio and takes decisions independently. By interacting with advanced beamforming and noise reduction algorithms, this system enables the device to automatically adapt to your speech while studying your sound environment. The technology within EPOS AI™ then successfully reduces the ambient sounds in your environment, thus, transmitting your speech loud and clear to your listener – where it matters most.

We aim to stay at the forefront of what is technically possible. With the ADAPT 660 we have launched the first edge AI based headset in the entire UC space, thus laying the groundwork to be pioneers within audio technology.

EPOS Sound™ – Sound as if you were right there

EPOS Sound™ makes the most out of your premium audio device by delivering a natural listening experience. Through continuous monitoring of ambient sound and varying noise levels, our technology helps you concentrate while taking care of your hearing: creating an augmented and immersive audio experience that sounds as if you are speaking to someone face-to-face or are right there in the same environment. No matter where you are. What's more, you can listen to your teammates or keep an ear out for announcements without removing your headset. For more focus, block out background noise with ease and enjoy the benefits of EPOS Sound™ – while watching your performance and energy levels rise.

EPOS Voice™ – Be understood in any environment

EPOS Voice™ improves your speech intelligibility and provides for a better conversation by creating an acoustic lens to focus on your speech. Through removing remaining noise disturbances, it ensures a more natural reproduction of the human voice. EPOS Voice™, furthermore, recognizes your environment in order to eliminate unpleasant background noise to clarify your sound picture. Making sure you can be heard no matter where you are – for the ultimate audio experience. With optimal control of noise levels, this technology allows for an effortless use of your digital voice assistants anytime, anywhere.

EPOS Voice™ Technology

The Natural Listening Experience

For the best possible communication between caller and listener, EPOS Voice™ technology uniquely enhances the most important frequencies and details of the human voice. For the caller, sound is crisper and clearer, allowing them to hear the

nuances contained in spoken conversation; for the listener, a noise-cancelling microphone sends the clearest signal to improve speech intelligibility. In combination this results in better, more natural sounding conversations where no important details are lost.

Play sound without EPOS Voice™

Play sound with EPOS Voice™

EPOS ActiveGard® Technology

Hearing Protection

During the course of a day, headset users may be exposed to seldom, but hazardous incoming noises that can be dangerous to their hearing. Technically referred to as a sound burst, this can potentially cause long-lasting damage to the human ear.

To safeguard users, all EPOS headsets for contact center and office environments are equipped with innovative EPOS ActiveGard® technology.

Play sound without EPOS ActiveGard®

Play sound with EPOS ActiveGard®

Please be warned that the sound without EPOS ActiveGard® can be extremely high. We recommend the volume should be set low when playing.

EPOS Sound™

Sound as if You Were Right There

EPOS Sound™ makes the most out of your premium audio device by delivering a natural listening experience. Through continuous monitoring of ambient sound and varying noise levels, our technology helps you concentrate while taking care of your hearing; creating an augmented and immersive audio experience that sounds as if you are speaking to someone face-to-face or are right there in the same environment. No matter where you are. What's more, you can listen to your teammates or keep an ear out for announcements without removing your headset. For more focus, block out background noise with ease and enjoy the benefits of EPOS Sound™ – while watching your performance and energy levels rise.

Play sound without EPOS Sound™ (Room Experience)

Play sound with EPOS Sound™ (Room Experience)

ANC Technology

Adaptive Active Noise Cancellation

EPOS has raised the bar on ANC technology with the introduction of ADAPT 660 – the industry's first UC certified adaptive ANC headset. ADAPT 660 leverages the latest, most advanced ANC technology to provide today's knowledge workers with an elegant, effective business tool specifically designed to adjust to the challenges of open office environments. EPOS' hybrid active noise-cancellation technology offers an "adaptive" dimension which constantly monitors your background environment and seamlessly adjusts to ambient noise around you, providing the correct level of suppression where and when it's needed.

This solution is unique from other ANC headsets in that it empowers you to take control of your sound environment, bringing a new dimension of peace and quiet lacking in other noise-cancellation solutions.

EPOS' superior headset solutions eliminate the incessant disruptions of today's open workspace and empower employees to reclaim control over their offices, for maximum focus and productivity.

* Listen to the Room Experience™ sound demo with a double-sided stereo headset.

SpeakFocus™ Technology

The ADAPT Presence and ADAPT 600 Series headsets automatically adapt to environmental differences to deliver the best sound possible with the help of SpeakFocus™ and WindSafe™ technologies.

WindSafe™ Technology

You never know when that important call will come. Be confident that wherever you take it – on the road, on the street or in the check-in queue, your voice can be clearly heard.

SpeakFocus™ technology focuses on your voice to deliver a crystal clear sound that enhances speech intelligibility for your listeners.

The unique 3 digital microphone system in the ADAPT Presence and ADAPT 660 headsets focuses on the target sound

– your voice – to deliver a calm, steady sound picture, which enhances voice intelligibility for listeners.

SpeakFocus™ technology ensures that your listener receives all the important details of your call to reduce misunderstandings – no matter where you are calling from.

The technology zooms in on your voice, works in all sound environments and adapts intelligently whatever the environment.

Wind noise can make it hard to hear what people are saying on the phone. However, it's the sender that causes the problem not the receiver. Even the best microphones can suffer during breezy conditions, making sound and voices indistinct and difficult to understand. With WindSafe™ technology, you can be sure that your listener won't be troubled by wind noise and that your message gets through, no matter what the weather forecast says.

WindSafe™ technology reduces wind noise to ensure the clearest possible sound is sent to your listener. By choosing the best mix of three microphones and processing the sound, WindSafe™ technology finds the best way to balance and enhance the user's voice when speaking outside in windy conditions.

Unified Communications

Moving Towards a UC Environment

A Unified Communications solution does precisely what it says: It brings together a company's voice, text and video based communication under one unified solution.

The advantages of a Unified Communications solution include enhanced overall efficiency of a business through increased productivity and mobility, resulting in a positive return on investment. The ability to view colleagues' availability status and send instant messages, reduces unnecessary emails and missed calls to an absolute minimum.

Whether in the office, at a meeting, traveling, or working from home, EPOS offers a comprehensive range of quality wired and wireless headsets and speakerphones to enhance your Unified Communications experience and helping you to stay in touch.

The human voice is still at the heart of all Unified Communications systems. It's the swiftest and most effective way of delivering and receiving important information. A EPOS headset for Unified Communications is designed to work seamlessly with major UC platforms and completes the solution with the best possible sound for both user and listener – ensuring your message always gets across clearly.

Our Partnerships

EPOS' partnerships with other technology-driven companies and vendors have a common goal – to simplify your daily business.

We are your one-stop audio solution provider for all your business communication needs.

Our Services

We've Got You Covered

EPOS Manager

Enhance Business Performance

Optimize your business and boost employee performance with a free, flexible and secure tool that manages your audio devices and analyzes their use. Get the latest firmware updates on your terms, improve productivity and minimize downtime.

Asset Management

Get the overview

See all your devices on the dashboard; from headsets to speakerphones and even non-EPOS devices. All users are registered in the system, which shows both active and inactive devices – who is using which device and how they are being used. Simply reallocate redundant resources to boost productivity. Reports on usage and firmware compliance keep you in complete control of company assets.

Update Management

Less downtime, more convenience

A flexible and cost-effective way to get the latest firmware updates to all your organization's EPOS devices, whenever it's convenient for you and your end-users. Push new updates to an unlimited number of devices across your organization from one simple dashboard. Schedule your automated updates to cause minimum downtime and disruption to your company's workflow.

Configuration Management

Easy for you, easy for end-users

The centralized configuration option allows all settings to be controlled from the IT department, ensuring that headset user's experience a simple plug and play solution. You can centrally push configurations or lock specific specifications on EPOS devices to comply with regulatory compliance settings for specific groups or individuals.

EPOS Manager for IT Administrators

EPOS Manager has been developed for companies with a need to control their UC environment in a fast and secure way. By installing the client application, EPOS Connect, on your end users' PCs, you gain a complete overview of all deployed devices and access to new updates and settings.

For companies with several locations, it's possible to manage, update and control settings for all end-users in the entire organization. For improved security, all communication and data are encrypted and no sensitive data is stored.

The resulting simplification of the asset, update and configuration management gives great savings in both time and money.

EPOS Connect for Headset Users

EPOS Connect is the client application running in the background on the headset user's PC. The solution ensures that EPOS headsets and speakerphones work seamlessly with various leading softphones and give you access to the latest firmware updates and personalized settings.

EPOS Connect is uniquely configured to either work together with a signed-up company account on EPOS Manager or as a stand-alone application for smaller companies or personal use.

Designed to be simple to use, the application allows EPOS headset and speakerphone users to enhance and personalize their experience and productivity simply and quickly.

Service and Support

We've Got You Covered

EPOS Global Service and Support aims at providing a premium customer experience to all our customers across the world. With a standardized support process across all channels, we can guarantee a uniform, consistent, structured and high quality handling for all support requests, from either end user, resellers, distributors, country partners or subsidiaries, throughout the world.
