

Move Your Business Forward with **Chrome Enterprise Upgrade**

Chrome Enterprise Upgrade unlocks the built-in business capabilities of Chrome OS devices for I.T. to secure, orchestrate and power the cloud workforce.

Advanced Security

Chrome Enterprise Upgrade provides I.T. with advanced security controls. If an end user misplaces their Chromebook, I.T. can easily disable the device, protecting corporate data. Devices can also be set as ephemeral, removing user data from the device at the end of a session.

Flexible Access

Chrome OS devices with Chrome Enterprise Upgrade provide flexible access to corporate data, regardless of use case. Integrate with Active Directory and SAML SSO providers or enable shared device use cases with managed guest sessions or kiosk mode.

Simplified Orchestration

Simplify orchestration of your Chrome OS device fleet. I.T. gains access to device policies, fleet oversight capabilities, and managed updates, all from the cloud-based Google Admin console or third party UEM solution. With zero-touch enrollment, drop ship managed devices straight to employees.

24/7 IT Admin Support

Contact Google for Chrome OS troubleshooting assistance with free, 24/7 I.T. admin support.

We can centrally manage Chromebooks in all of our customer offices using Chrome Enterprise Upgrade. Everyone can be on the same version of our application at the same time—there's just a single button to deploy versions to test environments as well as production.”
