

# BOOST YOUR REMOTE PRODUCTIVITY

## HPE Small Business Solutions for Remote Workers

### COPING WITH AN ENVIRONMENT OF PERVASIVE UNCERTAINTY

The current health crisis has resulted in a global slowdown, affecting small- and mid-sized businesses (SMB) more acutely. Many SMBs have embraced remote work and virtual collaboration to weather the storm.

But supporting remote work can present unforeseen challenges. You need to be sure you can provide the reliability and performance your employees need to be productive while keeping things simple for IT and ensuring you protect sensitive data.

### EMPOWER YOUR REMOTE WORKFORCE

**1** If you are running Windows Server at office, consider the embedded Remote Desktop Service (RDS). It's a great fit for simple desktop applications such as Microsoft Office and Outlook and you can set it up right away.

**2** If you need to provide access to more powerful applications or ultra-high-resolution graphics, or would like to prepare for the future with a more robust and flexible virtual desktop infrastructure (VDI) solution, choose an HPE Small Business Solutions for Remote Workers.

### A PRIMER ON VIRTUAL DESKTOP INFRASTRUCTURE (VDI)

RDS—a VDI feature included in Windows Server that enables desktop virtualization, either on the physical machine or on a virtual machine (VM)

- Desktop image, associated applications, and data cloned for user access over the network using remote desktop protocol
- Processing performed on on-premises server—not on local user machines
- All user instances run simultaneously on on-premises server

Other VDI solutions e.g., Citrix, VMware Horizon®, Teradici—uses virtualization software to abstract a pool of physical resources that can be configured for individual virtual desktops

- Unlike RDS, desktops not limited to a single OS or application architecture
- VDI solutions from HPE take the guesswork out of deployment with right-sized configurations customized for VDI

### HPE OFFERS RIGHT-SIZED IT SOLUTIONS FOR YOUR GROWING BUSINESS

Now that you've chosen VDI, give your organization the right balance with HPE Small Business Solutions. These ready-to-go packages include the hardware, software, services, and proven HPE ProLiant options you need to succeed.

HPE Small Business Solutions:

- Provides outstanding reliability, availability, business continuity, and fault tolerance
- Offers one-stop shop for complete solutions built on HPE ProLiant Gen10 servers—the world's most secure industry-standard servers<sup>1</sup>
- Comes in a variety of configurations, right-sized for healthcare offices, retail stores, startups, and other businesses
- Enables validation of every solution to avoid surprises

### WITH HPE, EVOLVING TO HYBRID CLOUD IS EASY

HPE Small Business Solutions are tested, customized, and validated for on-premises and hybrid cloud use cases with Windows Server 2019 and Microsoft Azure Cloud Services. Simply extend your solution to hybrid cloud for additional disaster recovery options with cloud services from Microsoft Azure or a managed service provider.

### ENABLE BUSINESS CONTINUITY WITH FLEXIBLE FINANCING

**HPE Financial Services (HPEFS)** is committed to help alleviate the financial stress of running a business. Protect your budget while helping ensure business continuity with HPE Financial Services programs.

### SERVICES TO GET YOU STARTED QUICKLY

- Simplify operations and educate IT staff with HPE Pointnext Services
- Reduce time spent on operational tasks while improving IT reliability with HPE Foundation Care, HPE Education Services, and others

Transition to remote work the right way with HPE Small Business Solutions that enables remote access to on-premises resources using VDI.
