

The countdown is on

Support for Windows 7 is ending January 14, 2020. **Now is the time to shift.** Upgrade to a new device with the Windows 10, Office, and the Intel® vPro™ platform today.¹

Maximize your productivity.

A new device with Windows 10, Office, and the Intel® vPro™ platform has up to 65% better performance compared to a three-year-old laptop.^{2,3,4} It gets better. Older PCs can only run about 5 applications simultaneously without it affecting performance, but newer PCs can easily run 8 or more.⁵

Protect what you've built.

Keep your files safe. With Windows 10, it's estimated that security events requiring IT assistance are reduced or avoided by up to 33%.⁶ Plus, new devices with 8th Gen Intel® Core™ vPro™ processors include built-in security features to help you stay one step ahead of cybercrime.

Transition seamlessly.

Windows 10 is compatible with 99% of Windows 7 apps.⁷ New Intel® Core™ vPro™ processor-based devices provide a future-forward foundation ready to efficiently support the regular cadence of Windows 10 updates

² Performance results are based on testing as of March 21, 2019 and April 3, 2019 and may not reflect all publicly available security updates. See configuration disclosure for details. No product can be absolutely secure. Software and workloads used in performance tests may have been optimized for performance only on Intel microprocessors. Performance tests, such as SYSmark and MobileMark, are measured using specific computer systems, components, software, operations and functions. Any change to any of those factors may cause the results to vary. You should consult other information and performance tests to assist you in fully evaluating your contemplated purchases, including the performance of that product when combined with other products. For more complete information about performance and benchmark results, visit <http://www.intel.com/benchmarks>

³ REFRESH CONFIGURATIONS NEW: Intel Reference Platform with Intel® Core™ i7-8665U Processor, PL1= 15W TDP, 4C8T, Turbo up to 4.8GHz, Graphics: Intel® UHD Graphics 620, Memory: 2x4GB DDR4-2400, Storage: 512GB Intel 760p SSD, OS: Microsoft Windows® 10 RS5, Build Version 1809 (Build 1763v1), BIOS: x177, MCU: A8 VS. OEM system with Intel® Core™ i7-6600U Processor, PL1=15W TDP, 2C4T, Turbo up to 3.9GHz, Intel HD Graphics 620, Display: 14" screen with 1920x1080 resolution, Memory: 8GB DDR4, Storage: 256GB SSD, Battery size: 36 Whr, OS: Microsoft Windows® 10 Pro RS5 Build Version 1809 (Build 1763v292), BIOS: v1.0.1, MCU: C2

⁴ Overall System Performance: As measured by SYSmark® 2018 comparing 8th Gen Intel® Core™ i7-8665U vs. 6th Gen Intel® Core™ i7-6600U. SYSmark 2018 is published by the Business Applications Performance Corporation (BAPCo), a benchmarking consortium. SYSmark tests Windows® Desktop Applications performance using real-world scenarios: Productivity, Creativity and Responsiveness. Mainstream applications used in the scenarios include Microsoft Office®, Adobe Creative Cloud® and Google Chrome®. Each scenario produces individual metrics that roll up to an overall score.
