The Work OS for Enterprise.

Power your organization to plan, run, and track projects, processes, and everyday work, from anywhere. Choose from dozens of building blocks to shape any workflow in minutes and connect your teams to get work done, faster.
monday.com Enterprise Plan.

The monday.com Enterprise Plan includes flexible platform capabilities suited for teams that need to securely plan, run, and track a variety of projects and workflows involving numerous roles and systems.

Key Benefits.

User Permissions and Governance Controls to Keep Your Content Safe

Efficient collaboration depends on the ability to confidently and securely share your information with the right people. monday.com ensures sensitive company and customer information remains protected, always. For example, account admins can set up permissions for who can create workflows or projects, share information, create integrations and automations, and so on.
Manage Large Teams with Workspaces

monday.com's unlimited Workspaces provides every team with a place to organize their work, connect with the right people and access information and apps that are most relevant to their everyday work.

Workspaces keep everyone focused on the work that matters to them, while bridging organizational silos and connecting teams and outside vendors when needed. Workspaces allow your team to keep everything in order as more team members join monday.com.

With Advanced Workspace Permissions, available exclusively on the Enterprise Plan, monday.com administrators can define which users can access a Workspace’s content and which users can create a Workspace. It gives users the flexibility to invite any team or individual into any Workspace, and decide which project and reports they can share.

"It’s been transformative for our team. We’ve experienced year over year productivity enhancement of 42% and customer satisfaction has gone through the roof."

Charles Vickery, Global Director

Frost & Sullivan
The security of our customers’ data is our top priority. monday.com is built with stringent security measures and protocols to secure your data in alignment with ISO/IEC 27001 and ISO/IEC 27018 standards.

We proactively perform annual security audits and assessments to ensure that our security standards are never compromised, including penetration tests and a managed bug bounty program.

**Peace of Mind with Built-in Security and Compliance.**

**Two-Factor Authentication**
Users are granted access only after successfully presenting two pieces of evidence to an authentication mechanism. For example, a text sent to their phone, or a code generated by an authenticator app. This makes it harder for potential intruders to gain access and steal identity. Two-Factor Authentication is available to all plans.

**Google Authentication**
A secure authentication system reduces the burden of user login by enabling them to sign in with their Google account. Google Authentication is available on the Pro and Enterprise plans.

“monday.com work OS is the central hub from which HubSpot teams manage critical cross-functional projects. We’re able to work in a way that suits our needs while still keeping teams closely aligned and highly empowered.”

*Mark Znutas, Senior Director of Operations, HubSpot*
Monday.com has been the backbone for our success. We can forecast if we have enough front-end business coming in and make adjustments accordingly to meet our monthly revenue targets. The platform was instrumental in helping us achieve a 60% increase in revenue during the crisis.

Shawn Murray, Chief Financial Officer, McChrystal Group

McChrystal Group
Dedicated Success Manager for Smooth and Quick Adoption.

A dedicated Customer Success Manager will act as your trusted advisor and will set you up for success from the get-go.

The team at monday.com gave an introductory training session. They worked closely with the managers at eMarketer to understand our pain points and what we were trying to solve while doing everything they could to find solutions that wouldn’t disrupt our current workflows. They were really great about meeting us where we were at.”

Heather Price, Deputy Editor
Additional Services

Self-serve Knowledge Base
Online training to help you educate yourself with articles and tutorial videos.

Continuous Product Updates
Live educational webinars and newsletters to keep you on top of all the new features released daily.

monday.com Community
An online community where you can learn best practices from other monday.com users, get inspired and share knowledge.

24/7 Dedicated Support
Priority support with an average response time of less than 10 minutes, available exclusively to Enterprise clients.

Integrations to Boost Productivity.

monday.com plays perfectly with the tools you use. You can seamlessly integrate monday.com with more than 40 external tools, connect your people, tools and processes together, and manage all your work in one place. Please note, the monday.com Enterprise Plan allows 250,000 actions/month. 10X more than the Pro Plan.

“The direct, one-on-one interaction we receive from the monday.com Customer Success Team is the biggest benefit of switching from Pro to Enterprise. The hands-on help the CS team provides is priceless. Having direct input on how to optimize boards, automations, and setup efficient workflows has accelerated our business.”

Chris Funk, Senior Product Manager of Innovation
Jira On-Premise Integration

Manage all tasks, issues, and bugs created on the Jira Server account in monday.com.

Connect your Product, Design and Support teams together and make engineering work visible to others in real-time. Jira on-premise integration is only available on the monday.com Enterprise Plan.

Fields supported by the integration between Jira and monday.com: issue key, issue type, project, string, priority, user, status, option, resolution, number, watches, time, date, progress, story points and votes. The monday.com integration with Jira Cloud is available on all plans.

Salesforce Integration

Incorporate valuable lead information from Salesforce into monday.com and streamline your customer relationship management processes.

This integration is only available on the monday.com Enterprise Plan.

This integration requires an Enterprise or Unlimited Salesforce subscription.

Automations

With monday.com you have the freedom to focus on the things that matter most. Liberate your teams from recurring work that holds them back from doing what they do best by adding automation recipes into your workflows.

Automations will streamline your business processes even further, eliminate tedious tasks and minimize human errors.

The monday.com Enterprise Plan allows your teams to perform 250,000 actions/month, vs. 25,000 actions/month offered on the monday.com Pro Plan.
Dashboards

One of the reasons managers love monday.com is that they get to see their work plans unfold at every level of the organization – from executive management all the way down to team leads.

Dashboards keep you focused on the bigger picture and provide a high level overview of your work, allowing you to ensure that everyone is aligned, and performing as efficiently and effectively as possible.

The monday.com Enterprise Plan allows you to aggregate data from 25 different projects into a single dashboard.

The monday.com Pro Plan is limited to 10 projects per dashboard, typically sufficient for small teams.
More than 100,000+ companies, across 182 countries, manage their everyday work on monday.com
