

SAMSUNG

 Unlocked by Samsung

Galaxy J3

Unlock your mobile workforce's potential.

Unlock true mobility and empower productivity through untethered freedom, security and an optimal user experience.

Work without barriers. The Samsung Galaxy J3 is a business-ready smartphone that's affordable enough to allow you to equip your entire workforce with a secure and professional device. Unlocked by Samsung smartphones allow you the freedom to choose your carrier and plan, and the built-in, best-in-class Knox security features along with easy fleet management make them ideal devices for practical, scalable enterprise deployments. For value-conscious businesses, the Galaxy J3 provides enterprise capabilities that make any mobile workforce smarter and more efficient.

Unlock Freedom

Carrier or no carrier. It's your choice. With Unlocked by Samsung smartphones, you have the freedom to choose what works best for your employees.¹ You can also standardize on one device across multiple carriers, greatly simplifying IT. And no-contract Unlocked by Samsung smartphones can be customized for a company's Wi-Fi only environment where no carrier is necessary, combining the functionality of a tablet with the portability of a hand-held device.

Unlock the Mobile Device Experience

Unlocked by Samsung smartphones don't come pre-loaded with any carrier apps, so you have a consistent UI, and you can customize device software exactly the way you need it. And Unlocked by Samsung smartphones are optimized for U.S. carrier networks,² with access to exclusive Samsung services like Knox and Samsung+ personal support.³ Nothing will hold you back.

Unlock Value

When everyone has the same UI, you have lower training, support and connectivity costs. You have the right contract with the carrier of your choice, or even have no carrier at all. Software updates are easily managed, and you can configure devices in bulk. And your unlocked devices are CapEx assets. With Unlocked by Samsung smartphones, you save from start to finish.

Unlock Defense-Grade Security

The Samsung Knox security platform⁴ is embedded within the hardware to ensure security from the chip up, right out of the box. Trusted by 29 governments and voted "most strong" by Gartner⁵, Knox features separate work and personal container solutions that guarantee user privacy while encrypting sensitive corporate data, so you can keep what's yours, yours.⁶ And monthly updates keep your Unlocked by Samsung smartphones up to date with the latest security patches.

Premium Design in an Affordable Package

The large, bright 5" HD Super AMOLED display provides excellent viewing quality for a device designed to be slim, light and comfortable for one-handed use.

Long-Lasting Battery and Expandable Memory

The 2600mAh battery is removable and replaceable, giving personnel in the field the ability to be fully powered when they need it.⁷ 16GB of internal memory provides plenty of space for files, videos and photos, and if more data storage is needed, 128GB of additional space can be added with a microSD card.⁸

Seamless Integration and Management

The Galaxy J3 is compatible with some of the most popular MDM, SSO and VPN solutions, making it easy to deploy and integrate without changing existing infrastructure. Bulk enrollment can activate large fleets of devices, while robust IT policies and APIs enable maximum control.
