

# Conserve your budget, but indulge in picture quality.

## A Budget-Friendly Monitor with Advanced Image Quality

Introducing a budget-friendly monitor with comfortable ergonomics, advanced image quality and modern design. The Samsung FT400 series features IPS panel technology for crisp type and colorful images, even at off-angles. With viewing angles of up to 178 degrees, collaboration is improved. Thin bezels make dual monitor configurations more seamless. Connectivity is made simple through HDMI and VGA, and the fully adjustable stand makes long days more comfortable. The FT400 series is the perfect monitor for businesses who want advanced monitors without the advanced prices.

### Key Features

#### True Colors All Around

Now the whole team can see perfectly. The IPS panel preserves color vividness and clarity across every inch of the screen, while wide viewing angles of 178° aid collaboration. You can work comfortably on the productivity-boosting wide display and everyone can see accurate tones and shades from virtually every angle, with no color washing.

#### Easy HDMI and VGA Connectivity

The FT400 series offers HDMI for quick, high-speed connections, as well as VGA for legacy analog applications.

#### Ergonomic, Adjustable Stand

The FT400 series monitor swivels, tilts, pivots and is height-adjustable. And since the monitor is VESA compatible, installation on a wall or separate mounting arm is easy.

#### AMD FreeSync

AMD FreeSync technology helps avoid tearing and reduce stuttering, ensuring smoother video display and playback.

#### Easy on the Eyes

Eye Saver Mode and Flicker Free technology provide increased comfort. When Eye Saver Mode is active, blue light levels are lowered, for reduced eye strain during long work hours. Flicker Free technology adds further viewing comfort by eliminating flickering at all levels of brightness.

#### TAA Compliant

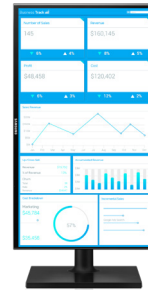

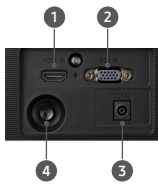

Samsung offers high performance and reliability, while complying with the federal Trade Agreements Act (19 U.S.C. and 2501-2581).

# Samsung FT400 Series Desktop Monitor
