

# SAMSUNG

## Powerful, productive, and the perfect road companion.

## Galaxy Tab® A

### Maximize mobility and productivity while ensuring security.

Empower your team to work from anywhere. The Samsung Galaxy Tab® A tablets are powerful business tools designed to improve productivity and workflow efficiencies throughout the mobile enterprise. Productivity is improved through real-time communication, and the preloaded Microsoft Office suite allows workers to create and work as effectively as on their desktop or laptop PCs. And Samsung Knox™ enterprise-grade security protects sensitive data. It's the ideal tool for workforces on the move.

#### Facilitate Mobility Anywhere

The thin, lightweight design of the Galaxy Tab® A tablets allow employees to work from anywhere, and enable better productivity, collaboration and communication. With up to 15<sup>1</sup> hours of battery life (Tab A 8" 2017), they can be productive all day. Add optional keyboards and a case with stand for powerful productivity solutions.

#### Microsoft® Office® for Android™ Apps Pre-Loaded for Productivity Enhancement

Optimized for Android™, Microsoft® Office® for Android apps come pre-loaded on the Galaxy Tab A tablets to improve productivity. Use Word, Excel and PowerPoint to conveniently view, create and edit documents, spreadsheets and presentations, and easily switch between PC and tablet to open and update them from anywhere with Microsoft OneDrive® cloud storage.

#### Powerful Performance

Android Nougat 7.1 provides enhanced business features such as battery-saving capabilities, multi-window multitasking, and enhanced security. Connectivity includes Dual Band Wi-Fi®, Wi-Fi Direct® and Bluetooth 4.2. And processors of up to 1.6 GHz octa-core (Tab A 10.1") provide powerful performance.

#### Samsung Knox Enterprise-Grade Security

Samsung Knox provides multi-layered device protection and separation of corporate and personal data,<sup>2</sup> and complements and improves existing MDM infrastructure without adding complexity. Knox customization allows tailoring of deployments for specific business needs.
