

Engage customers in a new way. Presenting the Galaxy Tab S5e.

Put enhanced productivity in the hands of your workforce.

The Galaxy Tab S5e delivers a more versatile mobile experience that gives you more freedom to work the way you want. Connect, type and share with ease; where, how and when it's best for you and your customers. And with security from the chip up and easy deployment and management, the Galaxy Tab S5e is truly enterprise-ready.

Key Features

Greater engagement.

Crisp. Clear. Captivating. A stunningly bright 10.5" state-of-the-art Super AMOLED display gives you room for dynamic, on-the-spot presentations.

Samsung DeX means more doing. When the Tab S5e is connected to a workstation via Samsung DeX, you can use Dual Mode to turn the Tab S5e into a second screen.¹ Guide clients through a presentation on the Tab S5e while you push more detailed content to a larger screen. You can also view multiple windows and screens at once on your Tab S5e.

Cinematic surround sound. Bring presentations, videos and more to life like never before. Dolby Atmos[®] and quad speakers tuned by AKG surround you in extraordinary sound.

Seamless everywhere.

Samsung DeX gives you a powerful desktop-like experience. Make any place a work space. Attach the optional keyboard cover, and Samsung DeX transforms the Tab S5e into a powerful desktop-like experience.¹

Powerful, long-lasting battery. When your team has a long-lasting battery of up to 14.5 hours on a single charge, they're always ready.²

The world's thinnest and lightest tablet. The lightest among 10" tablets (0.88 lbs.) makes it easier for mobile workers to hold it for long periods.

Store more, delete less. Take your data and files with you. Choose from 64 GB or 128 GB of built-in memory, and expand up to an additional 512 GB with a microSD card (sold separately).

Enterprise-ready security and manageability.

Defense-grade security. The Galaxy Tab S5e is protected by Knox, a security platform built from the chip up for superior protection.³

Management made easy. Knox Manage is a cloud-based EMM solution with an affordable license fee that lets you restrict access to certain apps or websites, and remotely wipe and support devices.

Easy changes and updates. With Knox Configure, you can provision and customize a large number of devices, push security patches and deploy application updates, all remotely. And built-in Enterprise Firmware Over-The-Air (E-FOTA) lets you control firmware and OS updates while allowing your devices to remain in the field.
