

Nutanix Mine with Veeam

Secondary storage simplified

AT A GLANCE

Nutanix Mine *with Veeam* is a comprehensive data protection and management solution that includes all the hardware and software components required to support any virtualized or legacy environment. It enables granular data recovery for mission critical applications and a path to longer-term data retention solutions with Nutanix Objects, Veeam Cloud Tiered, tape media and much more.

“Our testing of Nutanix Mine *with Veeam* shows significant performance improvements over our current environment. Proven scalability, and the flexibility to grow with our increasing business needs, is critical for us. This ensures we have the right backup and disaster recovery infrastructure in place protecting our data on a consistent and reliable basis.”

– Sean Gilliam, Ameritas

CUSTOMER CHALLENGES

Companies are modernizing their datacenters with hyperconverged infrastructure (HCI) for greater simplicity, performance, and scalability. However, though their infrastructure evolves, often their backup and data protection strategies don't, and they're left dealing with legacy backup solutions that aren't meant to meet modern requirements. Lack of control over data and backup leads to long and complex recovery, lost data, application unavailability, and missed service level agreements (SLAs). Nutanix Mine *with Veeam* brings the simplicity and scale of HCI and Veeam® to address customer's backup, long-term retention, and archiving needs.

SOLUTION OVERVIEW

Nutanix Mine *with Veeam* blends innovative technology from leaders in the space, allowing you experience top-notch cloud data management on an industry-leading enterprise cloud platform. The result is a full-stack solution enabling you to quickly go from project planning to a complete data management solution, without the cost and overhead of standalone systems.

COMPLETE DATA PROTECTION AND MANAGEMENT

Nutanix Mine *with Veeam* is a dedicated secondary storage solution designed to protect both your Nutanix and your legacy IT environment. It offers the advanced functionality and support of [Veeam Backup & Replication™ Enterprise Plus](#) and can leverage Veeam's cloud tiering capabilities to stage to longer term archival locations, such as Nutanix Objects, or S3-compatible storage.

CUSTOMER BENEFITS

The benefits of the Storware solution are:

- **Faster time-to-value**—Simplified customer experience for sizing, ordering, deploying, managing and scaling.
- **Unified IT operations**—Integrated operations from deployment to day-to-day data management.
- **Drop in, scale out**—Non-disruptively expand your existing data protection environment to scale with the business.
- **Single simplified solution**—Created and supported by two marketing leaders to remove complexity and ensure data availability.

RESOURCES AND GETTING STARTED

SIMPLIFIED MANAGEMENT

Through tight Veeam integration with Nutanix HCI data fabric and the advanced Prism management console, IT managers can now get a unified view to monitor and manage their HCI infrastructure and data protection environment.

SIMPLIFIED CONFIGURATIONS

Nutanix and Veeam remove guesswork when it comes to sizing and configurations. The solution is offered in two “right-sized” form factors optimized for performance. You can start off with the small system that is specifically designed to support up to 250 VMs, or the medium option that supports up to 500 VMs. At any time, if you want to scale beyond the small or medium systems, you can do so by seamlessly inserting add-on systems for a maximum of eight nodes. In this way, you can non-disruptively scale your data protection solution to meet your growing business needs.

	Small	Medium	Add-On System(Scale up)
Rack Size	2U	4U	2U
# of Nodes	4	4	2
Effective Capacity (Includes HDD & SSD)	96 TB	192 TB	96 TB
Veeam Licenses (VMs/Servers/Workstations)	250	500	250

SIMPLIFIED CUSTOMER EXPERIENCE

Nutanix and Veeam have radically simplified the end-to-end customer experience by streamlining all the steps—from sizing to providing joint customer support—to accelerate time-to-value for you and your company.

•**Size:** Veeam sizing has been integrated into the Nutanix Sizer tool. By selecting the “add secondary storage” checkbox, an appropriately sized Mine solution can be added to a primary environment sizing. The Veeam software configuration will be optimized to the appliance hardware.

•**Procure:** Nutanix Mine with Veeam is sold as a single SKU. No complicated bill of materials or manual assembly of piece parts is involved. Just answer three simple questions: number of VMs to back up, network connection, and required maintenance level, and we’ll configure a secondary storage solution that is right for your business needs.

•**Deploy:** Once you receive the pre-packaged solution, simply rack & stack the appliance and run an automated installation program (Foundation) to install both Nutanix and the Veeam software. Go from “power on” to configuring backup jobs in a matter of hours—not days or weeks.

•**Use:** Nutanix Mine is tightly integrated with Nutanix HCI data fabric and advanced Prism management console. That means, for the first time, customers can rely on a single pane of glass to monitor their primary storage as part of the HCI infrastructure, as well their secondary storage for data backup.

•**Scale:** When your backup environment grows and needs to be extended, Nutanix Mine with Veeam offers a seamless scale-out process. We provide a scale-out option to easily add expansion nodes to support more VMs non-disruptively into the your existing Nutanix Mine with Veeam deployment.

•**Support:** Nutanix and Veeam have worked together to establish a cooperative support program in order to jointly handle support cases and escalate cases in a timely manner. Feel free to call either Nutanix or Veeam when you have an issue; we’ll handle the rest!

SECONDARY STORAGE SIMPLIFIED FOR THE MODERN DATACENTER

Nutanix Mine *with Veeam* makes integrated data protection and cloud data management easy, providing performance, web-scalability, and intuitive backup simplicity. Discover a turnkey solution that delivers fast time-to-value, unified IT operations, and the ability to easily drop-in and scale up/scale out to meet the needs of today’s modern data center.
