

Expert-led workshops designed to empower business success

AT A GLANCE

Our **data protection fundamentals workshop** will provide you with the knowledge and best practices that your organization needs to enhance backup, recovery and archival strategies.

This complimentary workshop is designed to help you understand data protection concepts, rights and technologies in this ever-changing digital world. No prior knowledge is required for this half-day event.

Our expert panel will conduct a whiteboard discovery session at the beginning of each workshop to identify your company's needs and desired outcomes. We will provide you with an overview of data protection, its importance and the true cost of data loss. You will learn how different types of data are protected, as well as essential data protection tips, tricks and proven strategies.

Through a series of product presentations, software demonstrations and discussions, we will disclose what each data protection solution can deliver. Expect to walk away with the information you need to determine which one is right for your business.

REASONS TO ATTEND

- Learn the importance of data protection and the true cost of data loss
- Explore data protection trends and predictions
- Examine the challenges and use cases for data protection
- Understand the different data protection methods and recovery processes
