

Accelerate your future with an HCI Test Drive. Come ride with a company you can trust!

AT A GLANCE

Our complimentary **hyper-converged infrastructure (HCI)** test drives are a half-day event that will enable you to gain familiarity with Nutanix, HPE SimpliVity, and/or Dell EMC VxRail. No prior knowledge is required.

Each session will begin with an overview of HCI, followed by a deep dive discussion and demo of the solution(s) by our certified experts. We will then take you through a series of lab exercises that will explore management, monitoring and maintenance, expansion potential, high availability and data protection options, upgrade processes, troubleshooting tips, and much more.

You'll walk away from this event armed with the knowledge and experience you need to decide if HCI is suitable for your business.

REASONS TO ATTEND

- Acquire an understanding of HCI and how it differs from converged infrastructure (CI) and traditional IT
- Explore the fundamentals and advantages of a particular HCI solution and its key enabling technologies
- Obtain a technical presentation and demonstration of the software interfaces for a given HCI solution
- Receive hands-on lab access with an HCI solution to learn how it is deployed and operated
- Evaluate whether HCI can help you drive your business outcomes

WHO SHOULD ATTEND

- Managers
- Architects
- Engineers
- Administrators
- Technical decision makers
