

Symantec Enterprise Solution

Comprehensive Protection, Measurable Savings

Data Sheet: Data Protection and Security Management

Overview

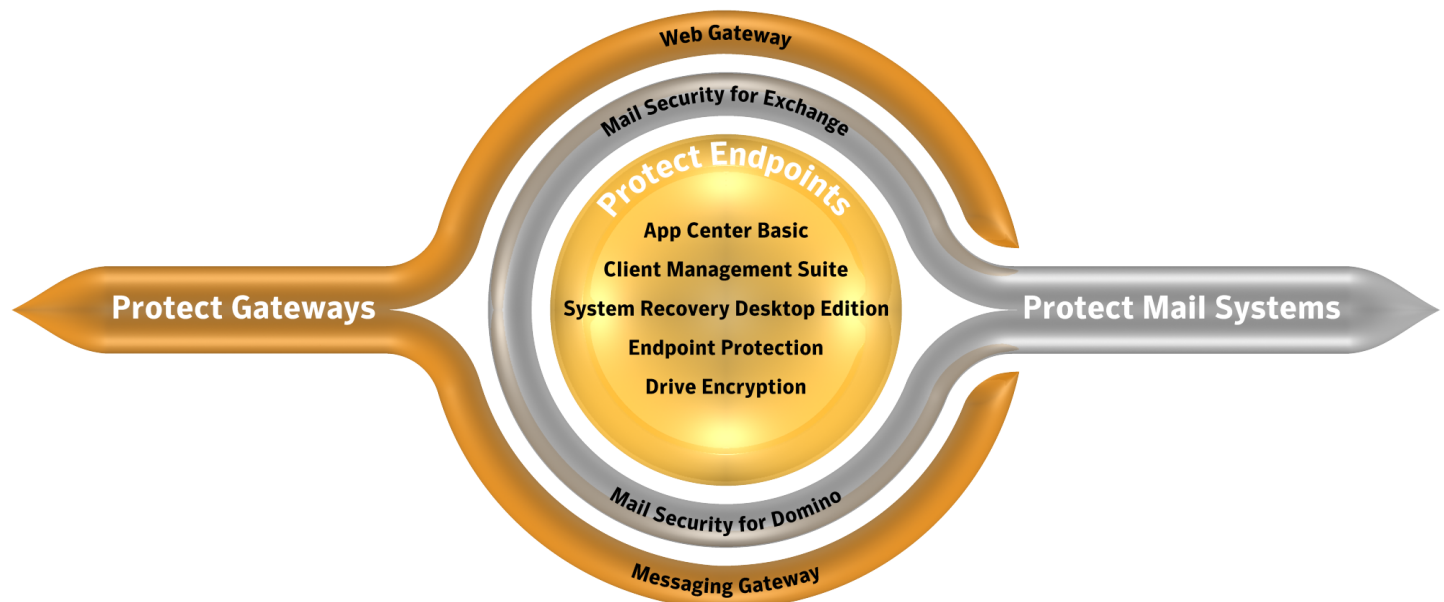

The Symantec™ Enterprise Solution is available as part of the Symantec™ Enterprise Subscription Agreement. The Symantec Enterprise Subscription Agreement is a three year licensing agreement for organizations of 250+ users, it allows you to standardize on solutions from one trusted vendor, receive attractive volume subscription pricing, and simplified licensing management covering your entire organization.

Symantec Enterprise Solution protects against malware and data loss with endpoint, mail and web security, drive encryption, and system recovery. Endpoint management simplifies application patching across multiple platforms including Windows®, Mac OS® X, and Linux™. Predictable subscription pricing and the ability to consolidate multiple security solutions under one single vendor, helps reduce ongoing costs.

Multi-layer protection—endpoint protection, encryption, and management complimented by mobile, mail/web security

Symantec Enterprise Solution provides multiple layers of protection to help you accurately identify and address risks while delivering strong data protection for mobile, endpoints, and mail/web infrastructure. The first layer of defense, protecting endpoints, secures the users, devices, and data with multiple technologies. The next layer of protection is at the mail servers, where most of your confidential data probably resides. The perimeter layer of defense for protecting your users, devices and data is provided at the messaging and web gateways, At this layer, scanning traffic bi-directionally ensures that confidential information stays in your network and malware and unwanted spam stays out.

Symantec Enterprise Solution

Symantec Enterprise Solution combines products to protect against today's complex malware, data loss, and spam threats with the fastest¹, most-effective² endpoint security, drive encryption, and system recovery. Symantec Enterprise Solution endpoint

management provides vulnerability assessment and effectively enables patching of hundreds of applications, while IT analytics can let you know what hardware and software you have, where it is, and how it's connected. Symantec Enterprise Solution includes App Center Basic, an easy-to-use mobile device/application and content management solution that secures all corporate data on mobile devices. Symantec data loss prevention and content filtering technologies at the mail and web gateways help you meet policy and regulatory objectives by automatically regulating the flow of sensitive information.

Symantec Enterprise Solution offers an unparalleled combination of award-winning technologies from a world leader in security and data protection. It enables you to comprehensively protect, intelligently manage, and automatically control the assets and data most crucial to your business—while helping to reduce upfront and ongoing costs.

Benefits of Symantec Enterprise Bundle

The Symantec Enterprise Solution bundle provides the **fastest, most-effective** endpoint protection for the explosive growth of advanced, persistent threats. It is designed to protect organizations of all sizes and complexity, including distributed organizations, with heterogeneous hardware and software requirements.

- *Unrivaled endpoint security*—Powered by Insight™, Symantec Endpoint Protection detects new threats on endpoints and at the perimeter, earlier and more accurately than signature or behavioral-based solutions alone.
- *Mobile device protection*—Symantec App Center Basic provides a unified platform to enable user productivity on mobile devices, regardless of the ownership (enabling bring your own device-BYOD), while protecting enterprise data.
- *Multi-platform encryption coverage*—Symantec Drive Encryption encrypts data across PC, Mac, and Linux laptops and desktops.
- *Rapid system recovery*—Quickly and easily restore physical and virtual desktops in minutes, to dissimilar hardware in both remote and virtual environments.

Address your **data protection and compliance needs** with the Symantec Enterprise Solution. Layer mobile, endpoint, server, mail, and web solutions for better protection and virtually eliminate IT complexity by standardizing software across your organization.

- *Perimeter gateway protection*—Apply multiple layers of security against malware and protect devices from messaging and web-based threats. Bi-directional scanning protects against inbound threats, blocking more than 99 percent of spam and preventing malware from transmitting out of the network. Content filtering and data loss prevention technologies make it easier to protect and control sensitive data.
- *Regulate sensitive information*—Identify and control the flow of sensitive information via email and IM, as well as on to and off of endpoints and mobile devices. Powerful business-level reporting and advanced analytics drive more accurate decisions.
- *Meet compliance requirements*—Encrypt sensitive data at the endpoint to meet privacy laws and governmental compliance requirements.

The Symantec Enterprise Solution allows you to take advantage of **single vendor simplicity and measurable savings**. Avoid the complexity of multi-vendor solutions and see measurable savings of subscription pricing while proactively securing your IT infrastructure to deliver real business results.

1. Highest overall score, fastest browse-time, lightest in CPU usage during system idle. PassMark Software, "Enterprise Endpoint Security Performance Benchmarks, Windows 7" Edition 2, August 2012.

2. AV-TEST, Product Review, Corporate Solutions for Windows 7, July/August 2013.

- *Effortlessly update*—If you already have Symantec solutions deployed, we make it easy to switch to the Symantec Enterprise Subscription Agreement by grandfathering your products with our true-up program. Adapt to risks faster and take action within minutes with information from the Symantec Global Intelligence Network, one of the largest security research networks in the world.
- *Eliminate complexity*—Deploy essential mobile, endpoint, encryption, messaging, and web security technologies from a single vendor to simplify troubleshooting, management of applications to enforce standards, track compliance and improve the end user experience.
- *Cost efficient*—Solve crucial security and endpoint management challenges across your network, while saving significantly over the purchase of individual point products. You can save procurement, implementation, and operational costs when they purchase Symantec Enterprise Solution through the Symantec Enterprise Subscription Agreement.

Enterprise Solution Component Products and System Requirements

Symantec Enterprise Solution bundle includes licenses for the products below.

- [Symantec™ Endpoint Protection](#)
- [Symantec™ System Recovery Desktop Edition](#)
- [Symantec™ Mail Security for Microsoft Exchange](#)
- [Symantec™ Mail Security for Domino](#)
- [Symantec™ Messaging Gateway](#)
- [Symantec™ Web Gateway](#)
- [Symantec™ Drive Encryption](#) (Powered by PGP)
- [Symantec™ Altiris Client Management Suite](#)
- [Symantec™ App Center](#) (Basic Edition)
