As threats evolved, so did our protection

2003
Acronis True Image launches
One backup solution for all data, applications, and systems of a workstation

2005
Global protection
Available in 12 languages for reliable data protection around the world

2010
Universal Restore
Recovery to dissimilar hardware enables system restores to any device

2015
Hybrid cloud backups
New hybrid cloud architecture enables storage locally, in the cloud, or both

2017
Protects backups from ransomware
First to incorporates anti-ransomware and blockchain-based notarization

2018
Fighting cryptojacking
Expands to automatically detect and stop cryptominers in real-time

2019
Microsoft 365 backups
Cloud-to-cloud backups of Microsoft 365 data, including OneDrive and Outlook.com content

2020
The cyber protection era begins
Acronis integrates best-of-breed backup with next-gen anti-malware to protect users' personal data from all threats

2021
Acronis Cyber Protect Home Office is here

We renamed our product to reflect all it does — which is so much more than full image backups.

It's complete cyber protection.
