# Adobe Acrobat Services

Faster business starts with document automation.

Save time and resources by automating critical document workflows with APIs, SDKs, and integrations from Adobe Acrobat Services.

The document processes businesses depend on are stuck in the past. Millions of PDFs are inconsistent due to manual creation, and trying to integrate disparate systems is difficult at best. Acrobat Services help you automate business-critical workflows for Document Generation, Document Intelligence, Document Accessibility, and Document Authenticity.

Automate custom document creation at scale with Document Generation.

Generating customized documents at scale for agreements, client and vendor onboarding, invoicing, and more can be challenging — especially when data is in multiple applications. Acrobat Services Document Generation solution makes it easy for anyone to create custom templates in Microsoft Word with conditional logic and merge that with any data for simplified personalization at scale.

Mine PDFs for valuable data with Document Intelligence.

Acrobat Services Document Intelligence helps you unlock structured content from scanned and native PDFs. Powered by Adobe Sensei AI, Document Intelligence helps you accurately extract data from reports, contracts, and more that can be injected into GenAI, NLP, ERP, or databases to gain valuable insights and build new forms of content.

Ensure everyone gets the message with Document Accessibility.

Millions of people rely on screen readers every day — yet **46% of digital documents aren't tagged for accessibility**. With Document Accessibility from Acrobat Services, you can leverage AI to automate tagging for documents at scale — reducing time, effort, and budget needed to be compliant with accessibility standards.

Fight cyber fraud with Document Authenticity.

Documents that have been tampered with can open your organization up to financial loss, negative tax implications, and more. Document Authenticity solutions from Acrobat Services help keep you safe by automating electronic sealing, electronic signatures, and document permissions — verifying the identity and authenticity of the documents you create.
