

## Change your perspective. Elevate your understanding.

Review and collaborate in your 3D models together in real-time to track issues, catch costly errors, and enable better spatial understanding—all synced directly with Autodesk Construction Cloud (ACC).

### Benefits of Autodesk Workshop XR

#### Simplified Workflows & Spatial Alignment

Streamlines design review processes, reducing miscommunication and improving alignment among stakeholders.

#### Fewer Design Issues & Reworks

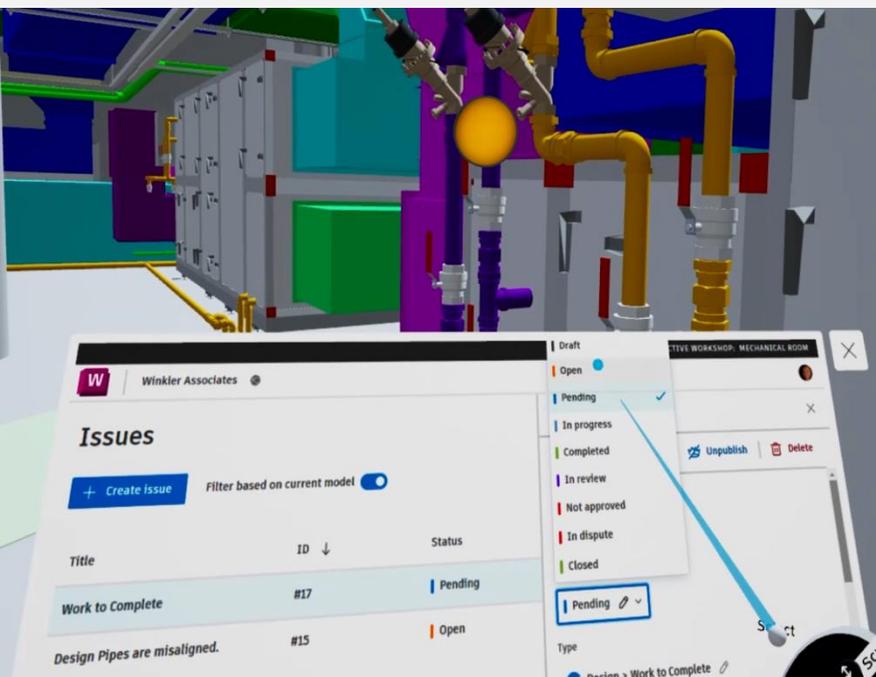

Enhances immersive design understanding, enabling early detection of spatial design issues to prevent costly reworks or delays.

#### Better Remote Collaboration

Facilitates effective collaboration on complex projects, supporting distributed work and more efficient decision-making.

Enhanced design reviews for **building engineers**, and **BIM/VDC professionals** – all connected through ACC.

### Capabilities

- **ACC Connection:** Walk through your models together and interact with connected ACC data.
- **Manage Issues:** Review and create issues immersively for project management.
- **Easy Project Interaction:** Explore and inspect your ACC projects for 3D project context.
- **Shared Access:** Additional option to access Workshop XR by utilizing the Workshop XR Web App through supported web browsers.

## Meet inside your existing projects in seconds

### Log into Autodesk

Select an existing Revit or Navisworks model from ACC to review, and join together in virtual reality

### Explore Models

Physically engage with project data in real-time, provide feedback and make decisions, capture issues in-context

### Align Faster

Manage issues natively in ACC and move project forward as your workshop stays up to date with latest project data

TMX

It used to take 3-4 hours per week to line up processing for two large projects at 400,000 square feet each. Now, with Workshop XR, it's streaming and directly connected to models. That is fantastic
