Benefits of SHI's Agile Cloud Engineering

Today, businesses are being pushed to innovate and solve problems at an accelerating pace. You want to leverage Amazon Web Services (AWS) as a platform for innovation, but need a partner that can meet you where you are and can't always plan for resource needs months in advance. SHI's Agile Cloud Engineering service for AWS provides on-demand access to certified cloud engineers and architects that work along side your team to solve your pressing business challenges.

AWS experts

Your aligned resource team includes deep expertise in AWS services and capabilities.

End-to-end tracking

Requests are centrally tracked in our SHI One Portal for full visibility into the status of your request.

On-demand expertise

Being agile means true on-demand access to a team of certified cloud engineers and architects working directly with your team.

Flexible pricing

Our consumption-based pricing allows for true pay-as-you-go access, tracked hourly, without monthly minimums.
