SHI Cloud Optimization Service

Our Cloud Optimization Support Service for Amazon Web Services (AWS) helps you save money on your cloud environment by identifying and prioritizing the largest cost saving opportunities on an ongoing regular basis. We find that customers over-spending in public cloud environments by **35%** and our service helps you optimize spending.

Free your in-house IT teams to focus on the activities that support the growth of your business. Moving to AWS frees up IT from having to manage physical hardware and, with SHI's Cloud Managed Services for AWS, you can leverage our expertise and scale to monitor and manage your cloud infrastructure.

Scope

SHI uses our own proven cost reduction and governance methodology to help you save money and reduce your cloud bill.

The highlights of this service include:

Access to cloud optimization support

Named cloud optimization consultant

Cloud optimization platform support

Monthly analysis and workbook preparation*

Monthly review meetings*

Reporting and alerts

* Frequency of meetings and level of customization vary based your monthly cloud spend

Service benefits

Customer's of SHI's Cost Optimization Support Service for AWS realize the following benefits:

- Wasteful spending within the cloud environment is identified and remediation prioritized.
- Customers are more successful in establishing a Cloud Center of Excellence by leveraging SHI's expertise. SHI helps customers establish a roadmap for optimizing AWS spend through architecture, licensing and programmatic changes.
- Customers save between 20 - 40% off their monthly AWS consumption after engaging with the program for 6 - 12 months.
- Customers reduce operational burden on internal staff for activities such as calculating chargebacks and preparing monthly reports and governing their cloud spend throughout their organization.
