

Update your clinical workflow, with bedside **HANDS-FREE SCANNING!**

Wireless Bluetooth LE 5, FIPS 140-2 Encryption, Hands-free scanning, Handled or Palm & Disinfectant-ready Plastics, and built for improved clinical workflows!

What does this mean to **you**?

1

More dedicated patient time

Speeding up the time it takes to complete repetitive tasks leaves more focus on the patient.

2

Hands-free scanning

With motion activated Presentation Mode, your hands are free to do more than hold a scanner.

3

Better patient care

Less attention on technology, means more attentive and detailed patient care.

"It is not the strongest
of the species that
survives, nor the most
intelligent, but the one
most responsive to
change."

- **Charles Darwin**
