

Boost Ransomware Protection and Resiliency

Key Benefits

- Improved data protection, detection, and recovery from ransomware and other cyber threats
- Simplified data management across hybrid clouds and multiclouds
- Simple, reliable and predictable deployment
- Lower TCO and 150% ROI¹
- Exceptional experience from Cisco

As organizations create, use and manage increasingly higher volumes of data residing everywhere—across hybrid clouds and multiclouds—keeping it safe from ransomware attacks and making it available and productive to the business have become complex and costly. Solutions from Cohesity and Cisco boost cyber resilience and data management at scale. Our jointly developed solutions modernize your data infrastructure, delivering increased data security and accelerated recovery with flexible options at reduced costs. With immutability at the foundation, integrated Cohesity and Cisco solutions feature a multi-layered approach that **protects** your data against ransomware, **detects** potential threats and **recovers** data rapidly where and when you need it. Because both Cohesity and Cisco dramatically reduce the components you need to maintain, you improve operational efficiency and give team members time back to spend on innovation.

Integrated Cohesity and Cisco Solutions

Cohesity is the *only* comprehensive data security and management solution certified on Cisco's cloud-operated UCS X-Series Modular System, ready to power your hybrid cloud and multicloud environments. Cohesity is integrated with Cisco Intersight, Cisco HyperFlex, and Cisco SecureX.

Protect

Key capabilities

- **Immutable backup snapshots** combined with Write Once Read Many (WORM) features prevent data modification or deletion
- **Comprehensive access controls** such as multi-factor authentication (MFA), role-based access controls (RBAC), and quorum/multiple approvals mitigate risk
- **Value chain security** embedded in Cisco solutions ensures the technology is genuine and tamper-proof

Unified offering

- **Data protection**
Cohesity on Cisco UCS X-Series Modular System with Cisco Intersight™ is a modern, future-ready backup and recovery solution. It protects and consolidates your primary workload storage, the file/object services to those workloads, and more onto a singular architecture within Cisco UCS for unmatched flash-optimized recovery.
- **SaaS-based cyber vaulting**
Cohesity FortKnox provides modern isolation and recovery with an immutable copy of data in a Cohesity-managed cloud vault.

¹ Forrester Consulting, "Forrester Total Economic Impact™ of Cohesity on Cisco UCS," November 2020.

- **Unstructured data protection**

Cohesity SmartFiles on Cisco UCS provides a modern converged target for securely consolidating and managing unstructured content and application data, including digital libraries, archives, rich media, video surveillance, big data, and backup data sets.

- **Access control**

Integration with Cisco Duo makes secure access to dedicated and multi-tenant Cohesity clusters simpler through seamless single sign-on (SSO) support.

Detect

Key capabilities

- **AI/ML-driven data anomaly detection** helps identify potential ransomware attacks and other malicious activities
- **Cyber vulnerability discovery** powered by Tenable helps identify vulnerabilities in your systems and data before recovery

Unified offering

- **Extended detection and response (XDR)**

The Cohesity + Cisco SecureX solution is the first-of-its-kind integrated data protection solution with SecureX that enriches threat intelligence with data context and accelerates the discovery, investigation and remediation of ransomware attacks.

Recover

Key capabilities

- **Instant mass restore** capabilities allow rapid recovery, at scale, to any snapshot point in time
- **Cisco UCS' stateless computing model** supports fast configuration of servers
- **ML-powered recommendation for clean recovery** that ensure the snapshot data is free from anomalies and potential cyber threats

Unified offering

- **Hybrid cloud disaster recovery**

Complementing our integrated data protection solution, Cohesity on Cisco UCS X-Series Modular Systems for disaster recovery gives you the choice to backup, replicate, archive, and recover file services and data on-premises or to the cloud.

“There was already 100% consensus among our engineers that the Cohesity-Cisco solution worked reliably, was easy to use, and we were all more productive with it. Now, there’s also agreement that Cohesity is the best solution to combat ransomware attacks.”

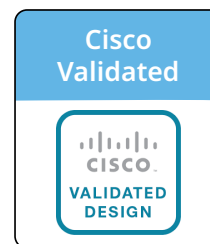

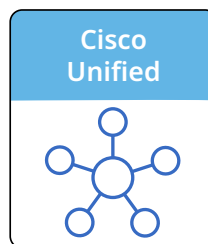

John Gaede, Director of Information Services, Sky Lakes Medical Center

Software as a Service

In addition to hybrid cloud, Cohesity offers flexible SaaS deployment. The Cohesity Cloud Services portfolio lets you secure and manage data across on-premises and cloud environments. You can scale on demand and increase innovation through advanced cloud services on AWS while freeing up IT resources and reducing infrastructure management costs.

Certified Solutions and Flexible Support Options

Cohesity software is certified on Cisco UCS C-Series, S-Series, and X-Series configurations. Deployment is a snap thanks to available Cisco Validated Designs. For an optimal purchasing, deployment, and support experience, Cohesity and Cisco solutions are available through the Cisco SolutionsPlus program and orderable directly from Cisco’s Global Price List. Support [options](#) include Cisco Solution Support for primary point-of-contact support.

Secure, protect, manage, and unlock limitless value from your data, wherever your data is, with Cohesity and Cisco solutions. Learn more at www.cohesity.com/cisco
