

Identity Accelerator

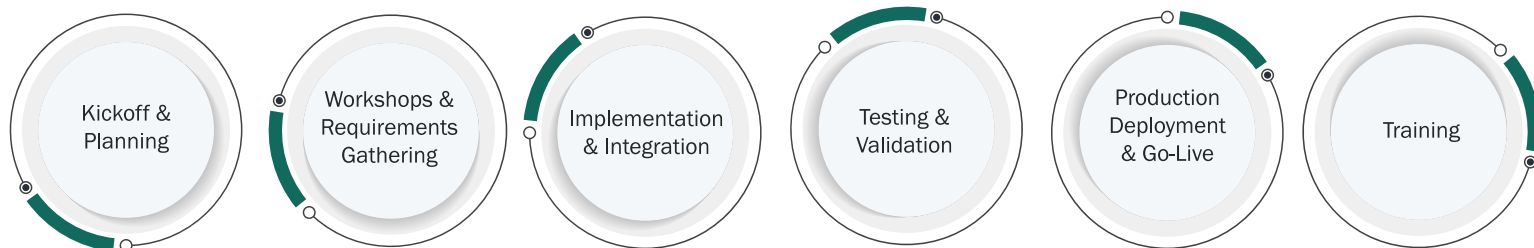

Privileged Access Management

Strengthen your security program and safeguard your most critical assets by using Stratascale's Identity Accelerator to speed and simplify your adoption of a modern PAM platform.

Rapid Results & Lasting Value

Stratascale will help you modernize your PAM platform and align processes, policies, and controls to reduce the risks of privileged access. But Stratascale practitioners offer more than just guidance on solution design and administration – they detail use cases for adoption and execute against a robust deployment and training plan. This ensures you experience a smooth, successful implementation that drives lasting impact.

Powerful Protection From a Single, Unified Platform

Stratascale leverages best in class PAM platforms like CyberArk Privilege Cloud to help you defend, control, and monitor privileged access across your entire IT estate from one place. Benefits include:

- | | | |
|--------------------------------------|------------------------------|------------------------|
| ■ Streamlined Privileged User Access | ■ Comprehensive Audit Trails | ■ Real-Time Monitoring |
| ■ Centralized Management | ■ Reduced Attack Surface | ■ Scalability |

Effective Privileged Access Management is Within Reach

When you combine CyberArk's first-to-market innovations with Stratascale's comprehensive services you get end-to-end identity protection.
