REDEFINING THE SERVICE OF MANAGED SECURITY

Managed Firewall Service

Deepwatch believes that businesses can secure their networks and enhance their security maturity quickly. We collaborate with our customers to establish a managed firewall program that reduces their cyber risk dramatically. The Deepwatch Managed Firewall Service arms customers with experienced engineers to monitor and manage their firewalls for them. We partner with our customers over long-term engagements to enhance their perimeter security capabilities, by providing recommendations on how to improve and mature their firewall deployments.

The Deepwatch Managed Firewall Service secures our customer networks by providing expert 24x7x365 firewall management and monitoring. Our experienced engineer's monitor, tune, and optimize deployed firewalls to ensure device health and rapid response to critical issues. Deepwatch analyzes firewall features, configurations, rule sets, and licenses to make sure firewall-based cyber defenses are optimized and customer investment in firewall technologies is maximized.

Threat actors continuously evolve their Tactics, Techniques, and Procedures (TTPs). Deepwatch collaborates closely with our Managed Firewall Service customers to stay ahead of the ever-changing threat landscape and modify firewall defenses accordingly.

Defend your network with continuous monitoring and management.

Tweak your defenses to stay ahead of the threat.

Collaborate to empower your existing security investments.
