

REDEFINING THE SERVICE OF  
MANAGED SECURITY

# Managed Endpoint Detection & Response Service

Deepwatch understands that security is a collaborative process. We work closely with our customers to establish strong foundations for maturing Security Operations (SecOps) programs. Our cloud SecOps platform and relentless customer focus have redefined the managed security services industry. We integrate best-of-breed security products including Security Incident and Event Management (SIEM) and Security Orchestration Automation and Response (SOAR) with our unique IP to automate security response and leverage our team of experts via our high-touch squad model.

**Deepwatch's Managed Detection and Response (MDR) Service provides 24/7/365 threat monitoring, alerting, validation, and proactive threat hunting.** Deepwatch provides comprehensive management of select security technologies. Our cloud based platform supported by world class experts ensures that we only alert customers to the most sophisticated security incidents. Our customers leverage Deepwatch MDR Service to free their security team from the time-consuming tasks of implementing, administering, and integrating multiple cybersecurity technologies while continuously advancing their overall security posture.

**Deepwatch's Managed Endpoint Detection & Response (MEDR) Service allows customers to take advantage of our deep bench of security expertise and our best-of-breed endpoint detection solutions.** We help our customers enhance their cyber defense capabilities to advance from purely reactive threat defense to a more proactive deterrence against sophisticated threat actor Tactics, Techniques, and Procedures (TTPs).

Fortification of security posture

Stop sophisticated threat actors

Deter future attacks

**Focused on relevant threats to your business, our MEDR services detect and block even the most nefarious threat actors with the most sophisticated TTPs. We collaborate with our customers to ensure they are provided with a well-defined endpoint detection and response program tailored to their specific security objectives. Deepwatch MEDR specialists will manage all aspects of the MEDR tool including threat detection, customized policy management, user account management, application whitelisting/blacklisting, console/agent upgrades, moves, adds, and changes.**
