

Organize and Automate Your Contracts Easily with DocuSign CLM Essentials

Start using in weeks, not months—and realize ROI fast

Growing companies need to hit aggressive business goals with limited resources. Leaning on small legal and operational teams to manually generate, negotiate, execute and properly manage contracts slows down business, increases risk and frustrates customers and employees. At the same time, many companies do not have the resources and time to implement a technology solution that will take months to set up.

DocuSign CLM Essentials

Contract Lifecycle Management (CLM) automates the end-to-end contracting process, including contract generation, review, negotiation and workflows. It also centralizes agreement storage. DocuSign CLM Essentials makes this functionality accessible at an affordable price point. It helps growing businesses get organized, execute more efficiently, automate the busywork and collaborate across teams. Because you can start using Essentials in weeks, you'll see rapid results in business efficiency and risk reduction.

Document generation

Contract templates

Centralize contract templates in CLM Essentials to ensure the latest legal approved language is always used. Create and edit templates easily with a drag-and-drop editor.

Automated generation

Insert data from an input form or Salesforce to populate each template with custom details for a professional contract. The contract is generated in seconds, with no hassles.

Collaboration

Version comparison

Send contracts to internal and external parties for review and approval with the ability to compare changes quickly and keep a full audit trail.

Comments and tasks

Use comments and tasks to collaborate with internal stakeholders more easily in one place and accelerate time to approval.
