*Certain limits and restrictions may apply. Compatible equipment required. Upon reaching your high-speed data allowance, speed may be slowed to a max of 128Kbps for the remainder of your bill cycle. Coverage not available in some areas. During times of congestion, data may be temporarily slower than other traffic.

Proven Security Protection from Fortinet

Web content filtering
Filters web pages containing specific content, words or patterns. Fortinet security helps prevent access from students to any inappropriate content or website with security risks.

Antivirus
Protects schools' devices and networks by Intelligently blocking malware from cyberattacks that cause data breaches, disrupt operations or steal sensitive information.

Application control
Analyzes application traffic and blocks risky applications in real time to optimize the connectivity performance and safeguard your school network.

Intrusion prevention
Detects and stops known and zero-day threats before they reach your students' devices by applying AI/ML-driven threat intelligence with thousands of intrusion prevention rules.

We Deliver A Better Solution Than Competition
