

Secure and optimize your contact center with ChromeOS

A recent IDC report found that ChromeOS deploys 63% faster than other operating systems and is 36% easier to manage.¹ The report found that deploying ChromeOS resulted in 19% higher agent productivity, and a 33% reduction in ticket resolution time.¹

Deploying ChromeOS enables contact centers to be cloud-first and agile while improving agent productivity, securing business data, and supporting IT teams with a stress-free device deployment and management experience.

No reported ransomware attacks on ChromeOS devices, ever*

24% fewer security attacks than other operating systems¹

Deploy ChromeOS **63% faster** than other operating systems¹

Protect your business and customer information

Safeguard your business from growing threats and reduce employee errors with built-in and proactive security features.

- Google Safe Browsing stops employees from navigating to malicious sites
- Executables can't run on ChromeOS, providing built-in protection from malware
- Automatic and timely security updates
- Built-in Titan C security chip ensures devices stay secure, protects user identity, and ensures system integrity

Increase your agent productivity

Reduce the cognitive load on your agents with an intuitive and productive experience on ChromeOS.

- Familiar, intuitive, and error-free experience
- Fast and easy onboarding
- Reduce device downtime with background updates
- Built in productivity tools
- Easily share devices and pick up where you left off

Deploy and manage easily even with high turnover

Manage and deploy stress free even with high turnover rates and distributed workforces.

- Deploy devices within minutes with no imaging through cloud profiles
- Drop ship devices and manage from anywhere with zero-touch enrollment
- 600+ configurable policies
- Deprovision existing ChromeOS devices and set up new agents with quick wipe/reset
- Repurpose existing Windows and Mac devices to a managed Chromium environment with ChromeOS Flex

¹ IDC Use Case Brief, sponsored by Google ChromeOS, The Business Value of ChromeOS for Contact Centers, doc #49610022, October 2022

*As of 2025 there has been no evidence of any documented, successful virus attack or ransomware attack on ChromeOS. Data based on ChromeOS monitoring of various national and internal databases.
