

ChromeOS for your small business

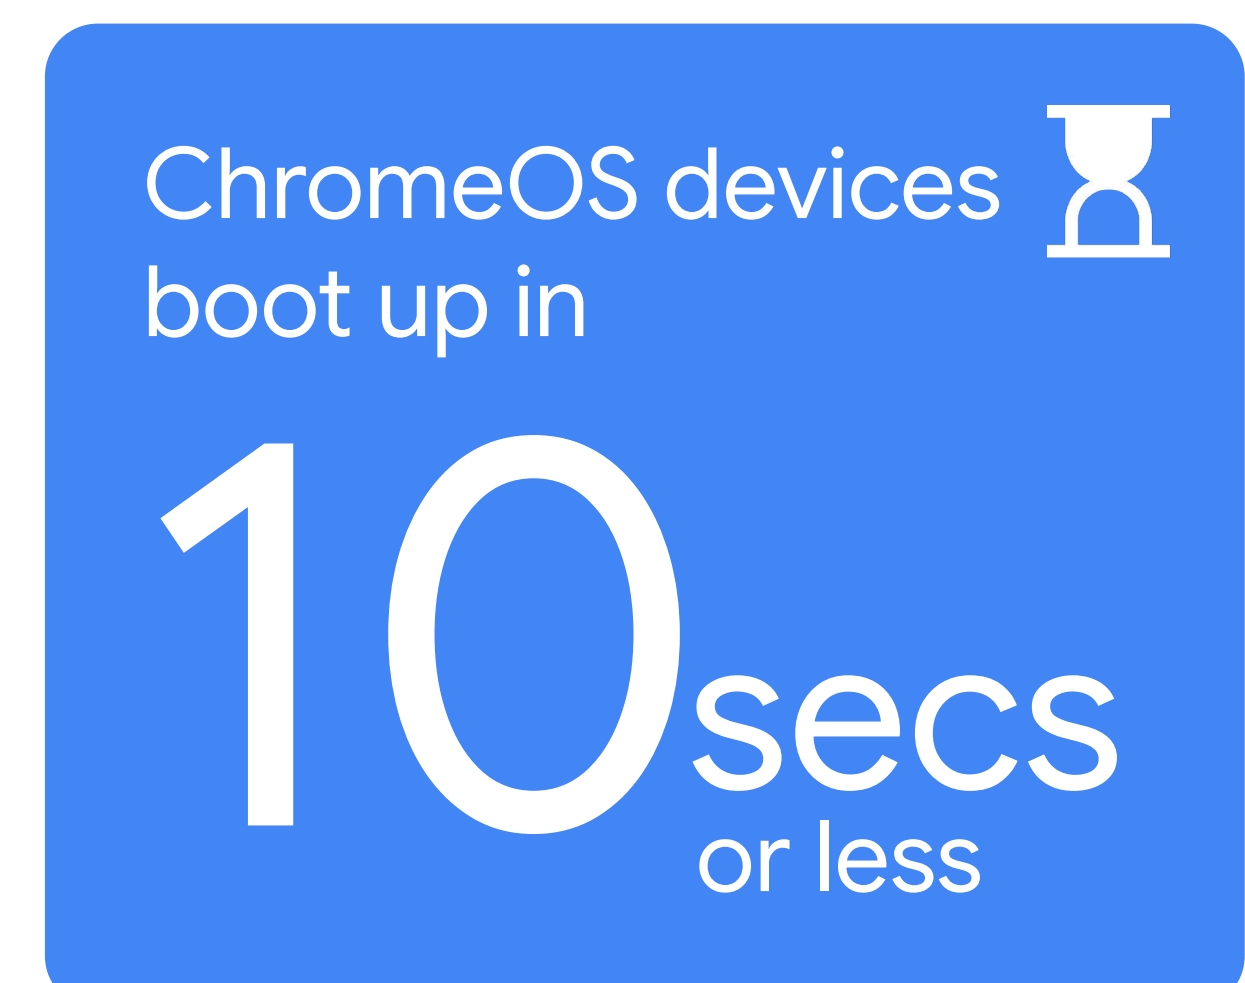

ChromeOS is a business-friendly operating system that saves you time, money, and hassle. It's fast, secure, and cloud-based, so you can stay productive no matter where you are. With ChromeOS, you can focus on what you do best and let your IT take care of itself.

ChromeOS devices are **63% faster** to deploy than other operating systems.¹ They deliver **77% more productive** time than legacy or other devices.¹ And they have had **ZERO reported successful ransomware attacks**. Ever.

What does this mean?

ChromeOS laptops and tablets are ready to go right out of the box, saving you up to 45 minutes per device.¹ Because ChromeOS devices boot up in seconds, sign in fast, and require little upkeep, so you get more minutes back in your day to tackle your to-do list. Ransomware files are automatically blocked by ChromeOS, which means your data is protected even if someone tries to open an infected file.

 Leave IT to ChromeOS

Find more time for the work you love

- ✓ **ChromeOS laptops and tablets cost 65% less** and provide cost savings, time efficiencies, and productivity gains worth \$1,700 per device over three years.¹
- ✓ **Access files and apps on any device.** Because data lives on the cloud by default, your workspace moves with you, and you can stay productive everywhere you go.
- ✓ **Auto-wipe all data and settings** every time a user logs out of their ChromeOS laptop or tablet to make it safe and simple for your employees and customers to share devices
- ✓ **Choose devices that suit your needs** from the diverse range of [ChromeOS laptops and tablets](#) available, or install ChromeOS on your PCs and Macs at no-cost with [ChromeOS Flex](#). You can also use Chromeboxes and other devices to power kiosks and digital signage.
- ✓ **Remotely disable lost or stolen devices** with the click of a button via the familiar Google Admin console. You can even wipe all the data if you need to.
- ✓ **Feel secure from the start** with ChromeOS laptops and tablets that check for issues every time they boot up. If a problem is detected, it's fixed automatically with no action required from you.

What if I need help managing devices?

With ChromeOS device management, Google support is there for you 24/7 to answer any questions that come up along the way.
