

English Drives the Global Workplace

Grammarly is the trusted AI communication assistant, meeting English-speaking team members at every level of fluency wherever they work and helping them communicate more fluently and faster.

Fluent, Quality Communication

Empower those whose primary language is not English with a real-time writing coach and translation tool available everywhere they work.

Stronger Customer Relationships

Deliver standardized customer-facing communications, ensuring a consistent customer experience.

Consistent Communication Across Teams

Ensure internal and external teams adhere to appropriate brand and industry guidelines.

Real-Time English Coach for Your Teams

English is the official working language for global teams. Ensure your English-speaking team members at all levels of fluency are fully supported to collaborate effectively and communicate well with customers.

75%

of English-language speakers worldwide do not have English as their primary language.

90%

of employers report a reliance on US-based workers whose primary language is not English.

Translation

Accurate in-line translation empowers your global teams to communicate faster and more seamlessly.

Fluency assistance

Ensure phrasing and word choice in all writing sounds natural and fluent all the time.

Grammar, spelling, punctuation suggestions

Error correction is available everywhere team members write, ensuring mistake-free writing and improved communication quality.

Brand tones

Ensure your teams are using a uniform brand voice, internally and externally, so employees present a united front.

Style guides

By adhering to a customized style guide, English speakers at all levels of fluency can achieve consistency and accuracy in their written communications.

Snippets

Create and insert reusable phrases, sentences, or paragraphs to help team members save time and stay on-brand.

Enterprise-Grade Security

Grammarly is trusted by one-third of the Fortune 500 due to our over 15 years of experience in secure, private, and responsible enterprise-grade AI. With Grammarly, businesses can move faster and drive greater results with peace of mind.

“Our support agents are ESL, and Grammarly makes them feel much more confident communicating with customers. It also helps them learn and improve their English while they are working.”
