grammarly

AI Your Business Can Run With

Grammarly is the trusted AI communication assistant that helps teams communicate better, faster—so they can achieve their business goals while staying on-brand and in compliance. It meets your teams everywhere they work and empowers them with the organizational knowledge they need to be more productive.
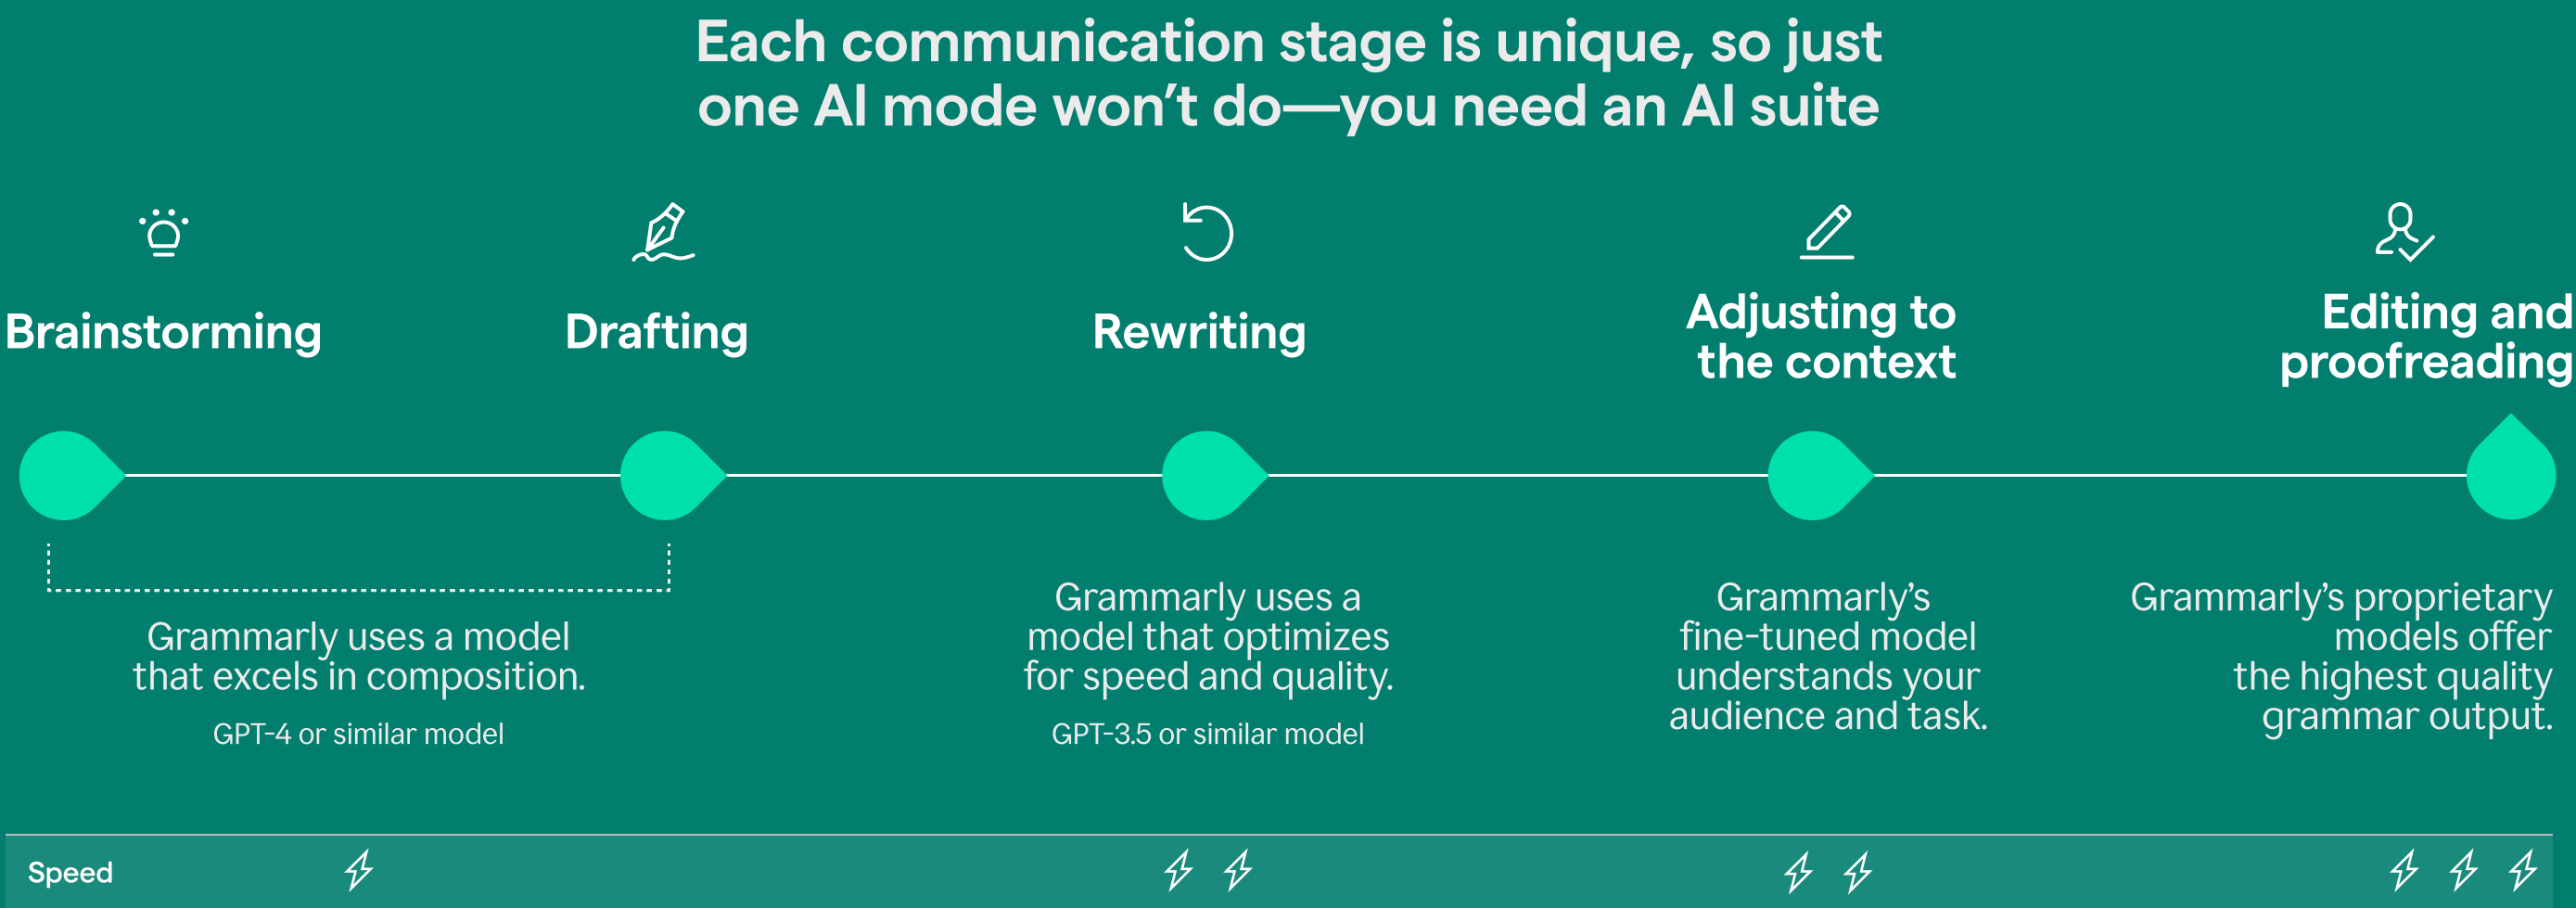

→ **Works everywhere you do**
Grammarly works across devices and on 500,000+ websites and apps, so teams can improve communication without copying, pasting, or breaking focus.

→ **The right AI model for every task**
Access the best AI model for the task, whether you're brainstorming new content, rewriting copy, drafting emails to customers, and much more.

→ **Customized to your brand, tone, and use cases**
Tailor Grammarly with your organizational information to generate highly contextualized, on-brand content.

→ **Suggestions that fit the context**
Get expert recommendations based on your goals, audience, and context.

→ **Secure, responsible AI**
Grammarly leads the way in enterprise-grade data security and privacy, which is why we're trusted by industries like healthcare and government.

Each communication stage is unique, so just one AI mode won't do—you need an AI suite

Brainstorming · **Drafting** · **Rewriting** · **Adjusting to the context** · **Editing and proofreading**

Grammarly uses a model that excels in composition.

Features That Transform Workflows

→ **Generative AI**
Speed up every step of the writing process, from blank page ideation to editing with generative AI that delivers highly contextual, relevant, and on-brand generated content.
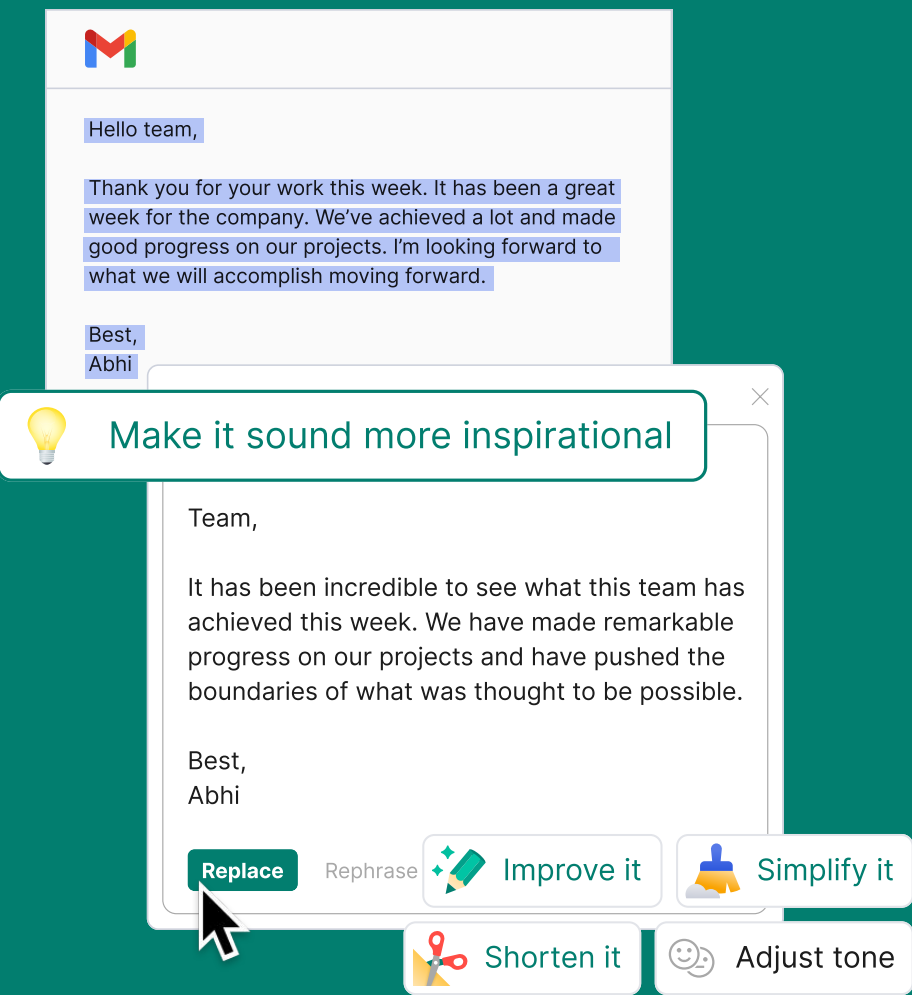

→ **Strategic Suggestions**
Ensure relevant organizational information surfaces for each person at the right time. Proactively guide employees to be strategic as they write, with in-line suggestions that prompt them to tailor writing to their unique voice, intended audience, and desired outcomes.

→ **Style Guides and Brand Tones**
Empower every employee to create consistent, on-brand communications with responsive style guides and real-time brand voice guidance.

→ **App Actions**
Take the next best step directly from where you're writing, reducing context-switching and accelerating productivity.

→ **Knowledge Share**
Surface institutional knowledge where your teams are working and save time on context-switching or searching for information.

→ **Analytics**
Monitor consistent usage across the organization and gather insights into whether employees are adhering to your brand's rules and guidelines.

AI Built Responsibly

Grammarly provides enterprise-grade security and AI built with fairness and safety in mind. Customer and business data is never sold or used to train models. Enterprise clients can provide their own encryption keys and choose how long employees can stay logged in before needing to reauthenticate. All data is anonymized and processed with no user data stored for security.
