Keeping Your Team's Writing Safe at Grammarly

We keep security at the heart of our product, infrastructure, and company policies.

"We are obsessed with time savings and efficiency ... It's part of our core DNA. Technology that improves efficiency is critical to scaling our most important resources—our people. When tools and technology can help you be a better you, it's worth the investment."

Dan Cane, CEO, ModMed

"Credibility and trust start with good communication. Grammarly provides an enormous amount of value in building credibility."

Narsi Subramanian,
VP Customer Support, Databricks

Ensure quality communication, company-wide

From instantly creating a first draft to perfecting every message, Grammarly already helps one-third of the Fortune 500 get their point across—and get results.

Lead with secure, private, and responsible AI

Grammarly is built on 15 years of expertise in secure, private, and responsible enterprise-grade AI and is backed by the highest certification and regulatory compliance standards.

Enhance productivity wherever your teams are working

Grammarly provides generative AI-powered support across 500,000+ apps and websites for the enterprise of tomorrow.

Enterprise-Grade Security

Grammarly is built on best-in-class infrastructure, following industry standards to guarantee security, availability, integrity, and adversarial robustness. These are regularly improved through internal testing and with industry-leading partners. This is proven through our enterprise-grade attestations and regulatory compliance, verified and audited by industry-leading third parties.

Data Privacy

We have not, do not, and will not sell customers' data or rely on an ad-based revenue model. Grammarly makes money by selling subscriptions. The entire Grammarly company is dedicated to this principle. We give you complete control and transparency over data usage.

AI Experience

Grammarly is an established tool for enterprises, trusted by over 70,000 teams. Our team ensures the development of safe, responsible AI and has for over 15 years.
