

Packaging isn't an afterthought at Lenovo.

We are focused on protecting our products with sustainable materials and minimizing waste.

Since 2008, we've eliminated more than **3,100** tons of packaging by weight.

ThinkPad® X1 Carbon

Bio-based materials

Bamboo and bagasse packaging is 100% renewable and biodegradable.

Reduced bulk

Lighter materials and slimmer packages improve transportation CO₂ emissions by 6.7%.

Self-locking cartons

Ingeniously designed tapeless boxes help reduce our use of plastic tape.

Commitment to recycling

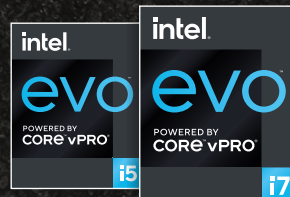

Lenovo ThinkPad® products are made with post-consumer recycled content. And they feature the Intel® Evo™ platform, powered by Intel® Core™ vPro® processors that use 100% conflict-free minerals.

Engineered for efficiency

One innovative redesign increased the number of units on a pallet from 48 to 96 and eliminated more than 400 tons of packaging.
