

EXPANDING THE POWER OF EDUCATION: LOGITECH HEADSETS & AUDIO

Logitech Supports the Largest School Districts in the US

For Teachers:

Be heard, prevent learning loss

Students, especially younger ones, lack the auditory processing skills required to decipher contextual meaning making it essential to clearly hear every word spoken.

Eliminate distractions

Background noise can disrupt the flow of the teacher and hinder the lesson for all students.

What is Works With Chromebook?

When you see the Works With Chromebook badge, it means that this Logitech device meets compatibility standards, working seamlessly with Chromebooks.

For Students:

Calm classroom chaos

Different students may work on different tasks simultaneously, needing to "drown out" other sounds to focus.

Be heard, build confidence

Presenting via video call requires students to speak clearly and without interruption. Softer voices or background noise may prevent students from being heard correctly, contributing to inaccurate results and may lower student confidence.
