

NetIQ: a comprehensive IAM suite

Identity-powered Zero Trust

NetIQ Identity and Access Management (IAM) secures organizations through a comprehensive set of identity and access services for workforce and customer identities.

Workforce identity

- Enable an efficient, work-from-anywhere workforce.

Customer identity

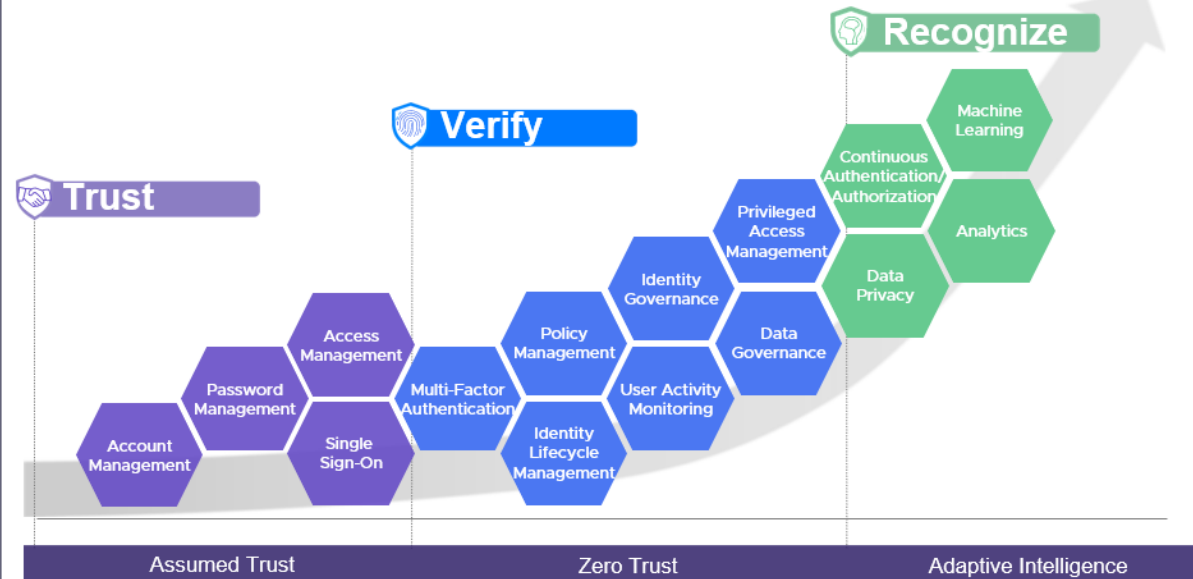

- Offer a secure, seamless user experience.

NetIQ Identity and Access Management is part of OpenText Cybersecurity, which provides comprehensive security solutions for companies and partners of all sizes.

OpenText has completed the purchase of Micro Focus, including CyberRes.

Evolve to Adaptive Authentication

Match authentication strength and authorization level to the measured risk at hand.

Identity Governance and Administration

Govern access to resources, adapt to risk, and improve business agility with a comprehensive IGA platform.

Identity Manager

Manage and provide adaptive, context-based secure access to the right users on any device.

Identity Governance

Govern access to applications and data across your diverse enterprise landscape. Automate your access review and recertification processes. Off cloud (on-premises) or SaaS.

Data Access Governance (DAG)

Gain the same level of control over unstructured data as you have with services by extending your identity governance to documents and files.

NetIQ: a comprehensive IAM suite

Access Management

Manage and provide adaptive, context-based secure access to the right users on any device at any location while minimizing risk.

Access Manager

Deliver seamless single sign-on (SSO) to browser-based and cloud apps. Provides risk-based authentication balancing security versus productivity.

Advanced Authentication

Provide passwordless authentication and elevate secure access to meet regulatory compliance with this extensible, standards-based authentication framework. Off cloud (on-premises) or SaaS.

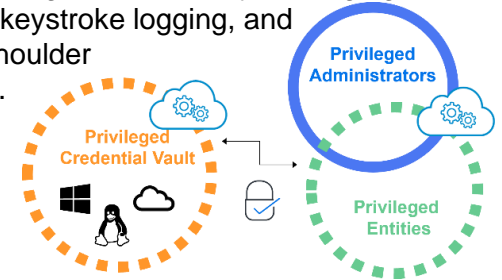

Privileged Access Management

Privileged Account Manager

Centralized management of elevated credentials using flexible, policy-based methods that enforce least privilege access.

Monitor privileged sessions by leveraging session recording, keystroke logging, and over-the-shoulder monitoring.

Policy Orchestration

NetIQ enables you to extend AD policies to your entire IT ecosystem and centrally manage policy and configuration changes.

Universal Policy Administrator

Centrally manage security and compliance policies across your entire IT environment.

AD Bridge

Leverage Microsoft Active Directory to enforce identity and access policies across multiple platforms.

Change Guardian

Real-time monitoring, detection, and response to unauthorized changes to critical files, systems, and applications.

Directory Resource Administrator

Simplify, delegate, and automate the administration of your Microsoft Active Directory investment.

Platform components

NetIQ secures organizations with a comprehensive IAM platform

Risk Service

Adapt the authentication and access experience to the risk at hand.

Self Service Password Reset (SSPR)

Administer and enforce strong credential policies and provide self-administration for end users. Enables users to reset their own passwords.

Secure API Manager

Secure and manage APIs of any kind: cloud, SaaS, web-services, micro-services, or IoT. Provides security for public-facing APIs.

SecureLogin

Streamline user authentication by providing a single secure login experience for all your desktop applications.

Trusted by some of the largest deployments in the world for Workforce, B2B, and B2C.
