

# Singularity™ Endpoint

Autonomous, Next-Gen EPP and EDR

As digital landscapes transform, the speed, sophistication, and scale of threats against endpoints have also evolved. User endpoints remain a key attack vector for malicious actors seeking deeper access to your network. Simultaneously, security analysts are overwhelmed with the sheer number of false positives and alerts, which requires time-consuming manual investigation. Security teams need a more efficient and robust solution to secure every endpoint in their environment.

Singularity Endpoint combines next-gen prevention with real-time detection and response in a single platform with a single agent, empowering security teams to easily identify and secure every user endpoint on their network.

## Industry-Leading Endpoint Protection

Deliver unparalleled endpoint protection and detection with broad visibility, rapid response times, and minimal incident dwell time. As evidenced in the 2022 MITRE Engenuity™ ATT&CK® Evaluation, SentinelOne delivered 100% protection and detection with zero delays and the highest analytic coverage in real-time.

## Quickly Contain Attacks With Built-in Automation

Patented Storyline™ technology provides analysts with real-time actionable correlation and context. Analysts can understand the full story of what happened in the environment with automatic linking of all related events and activities together with a unique identifier.

Automate response to affected endpoints to reduce the mean time to respond. Autonomously resolve threats with our patented one-click remediation to reverse all unauthorized changes.

## Streamlined Security

Investigate, triage, and hunt with zero learning curve to bring IR and hunting to a broader pool of security talent. Uplevel SOC resources for proactive threat hunting with automated hunting rules, intel-driven hunting packs, and support for MITRE ATT&CK techniques. Easy-to-use search and pivot lighten analyst load to hunt across large volumes (up to 3+ years) of EDR telemetry.

## Key Features And Benefits

### Protect

Protect endpoints in real-time

### Detect

Detect threats without human intervention

### Respond

Remediate threats with automated or 1-click response actions

- + AI-based malware and ransomware protection
- + Patented 1-click remediation and rollback
- + Industry-leading coverage for Windows, Mac, and Linux, including legacy OSes
- + Mobile endpoint support for iOS, Android, and ChromeOS
- + Autonomous operation. Works on- and off-network
- + Hunt by MITRE ATT&CK® Technique
- + Flexible EDR data retention up to 3+ years
- + Rapid deployment interoperability features ensure a fast, smooth rollout
- + Single cloud-delivered platform with true multi-tenant capabilities to address the needs of global enterprises and MSSPs

Scalable Security Platform

Singularity is architected as a highly available SaaS solution with true multi-tenancy and multi-site hierarchy. Best-in-industry coverage across all major operating systems and a rich integration ecosystem extends the platform to your existing security investments.

Secure Every Endpoint in Your Environment

Singularity Endpoint provides a comprehensive solution to secure every endpoint, no matter where they are in your world.

✔ Use static and behavioral AI models to protect endpoints from threats	✔ Respond to threats with 1-click remediation and rollback	✔ Investigate and hunt for threats with automated rules and intel-driven packs

The screenshot shows the SentinelOne Singularity dashboard. It includes a sidebar with navigation icons and a main content area. The main area has tabs for 'APPLICATION MANAGEMENT', 'RISKS', 'INVENTORY', and 'POLICY'. Under 'APPLICATION MANAGEMENT', there's a 'Select filters...' dropdown and a 'SEVERITIES' donut chart showing 679 Applications with a breakdown: Critical (10.75%), High (38.14%), Medium (47.72%), and Low (3.39%). To the right, an 'EXPLOITATION' section shows 103 (15.99%) Exploited in the wild and 40 (18.6%) High exploit code maturity. A 'MOST IMPACTFUL APPLICATIONS' bar chart shows Windows Med... and VMware Tools. Below these is an 'Actions' section with a table of applications.

Application Name	Type	Versions	Vendor	Highest Severity	Highest Vulnerability
.NET Framework	Application	2	Microsoft	Critical	10
Mozilla Firefox	Application	27	Mozilla	Critical	10
libOff	Application	2	Amazon Linux	Critical	10

Innovative. Trusted. Recognized.

A Leader in the 2022 Magic Quadrant for Endpoint Protection Platforms

Record Breaking ATTACK Evaluation  
+ 100% Protection. 100% Detection  
+ Top Analytic Coverage, 3 Years Running  
+ 100% Real-time with Zero Delays

96% of Gartner Peer Insights™ EDR Reviewers Recommend SentinelOne Singularity

About SentinelOne

SentinelOne is the world's most advanced cybersecurity platform. The SentinelOne Singularity™ Platform detects, prevents, and responds to cyber-attacks at machine speed, empowering organizations to secure endpoints, cloud workloads, containers, identities, and mobile and network-connected devices with intelligence, speed, accuracy, and simplicity. Over 11,500 customers—including Fortune 10, Fortune 500, and Global 2000 companies, as well as prominent governments—all trust SentinelOne to Secure Tomorrow.
