

# Singularity™ Mobile

Introduction

---

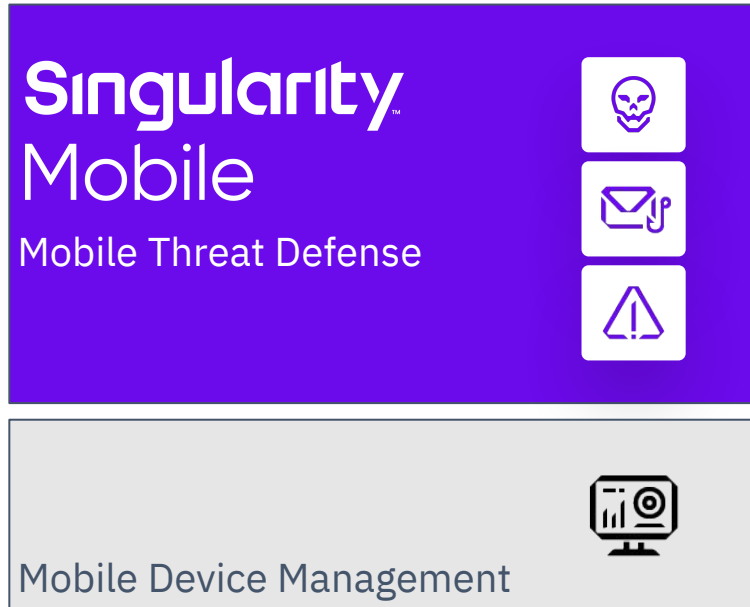

December 2021

# The Need for Mobile Threat Defense (MTD)

- ✓ The workstation vs mobile line is blurring as mobile enterprise access increases.
- ✓ Protect 2FA as mobile devices become how users verify trust.
- ✓ Increasing attacks on mobile devices now outpace Linux and IoT.
- ✓ Mobile credential theft has become a critical attack technique.

# Management IS NOT Security

## Real-time, behavioral mobile protection

- malware
- phishing
- MITM

DIFFERENT JOBS

-----  
COMPLEMENTS

-----  
NOT SUBSTITUTES

## Administration & Enforcement

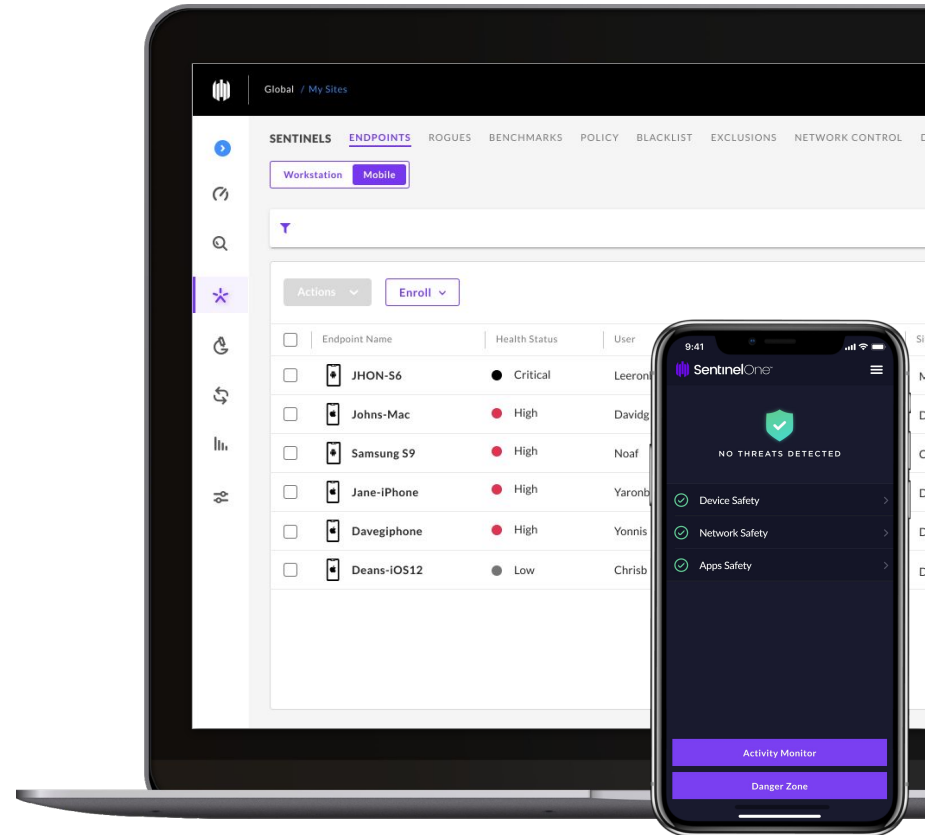

- require PIN code (policy enforcement)
- lock or wipe mobile device

# Singularity™ Mobile

## Mobile Threat Defense

### SentinelOne's approach to mobile security:

- Behavioral AI-driven protection vs. unknown malware
- ✓ Real-time phishing prevention
- ✓ Integrates with all major MDMs
- ✓ Privacy built into the design
- ✓ Available on iOS, Android, ChromeOS
- ✓

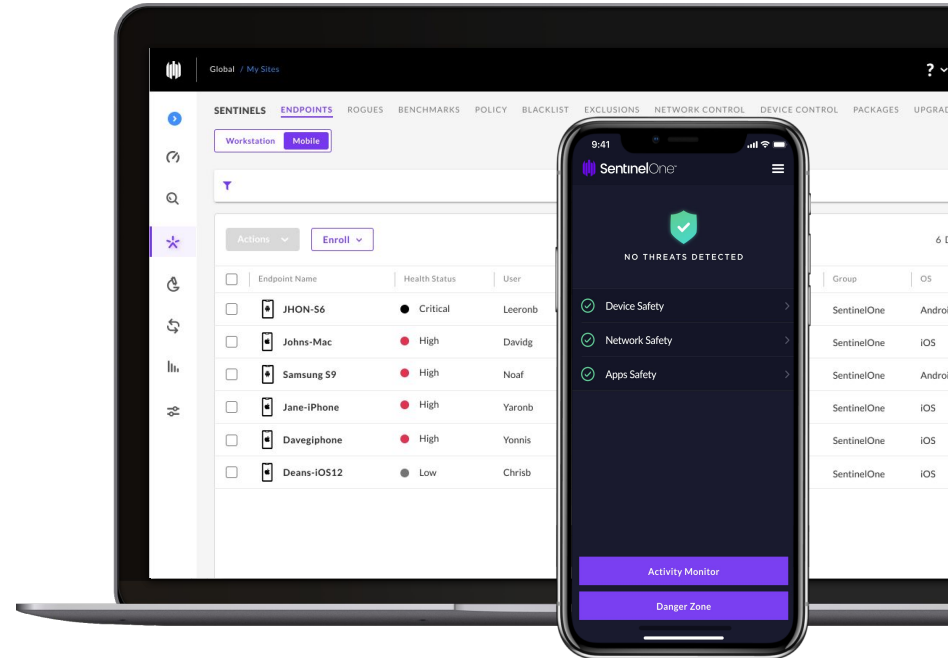

# Mobile Threat Defense

## Easy to deploy and manage

- **Integrated with all major MDMs**
  - Easy deployment via MDM
  - Conditional access: lock down access as risk increases
  - Works with or without an MDM

## Strong privacy controls

- **GDPR compliant, BYOD safe**
- **The engine never collects user content, messages**
- **Advanced privacy features**
  - Disable Application Inventory
  - Disable collection of network details like SSID

Behavior-based  
malware detection

Phishing  
prevention

Untrusted network  
detection

MITM  
detection

Jailbroken device  
detection

App inventory  
with risk scores

Deep inspection  
for apps

Device pin  
not set

# Chromebook Overview

## Visibility

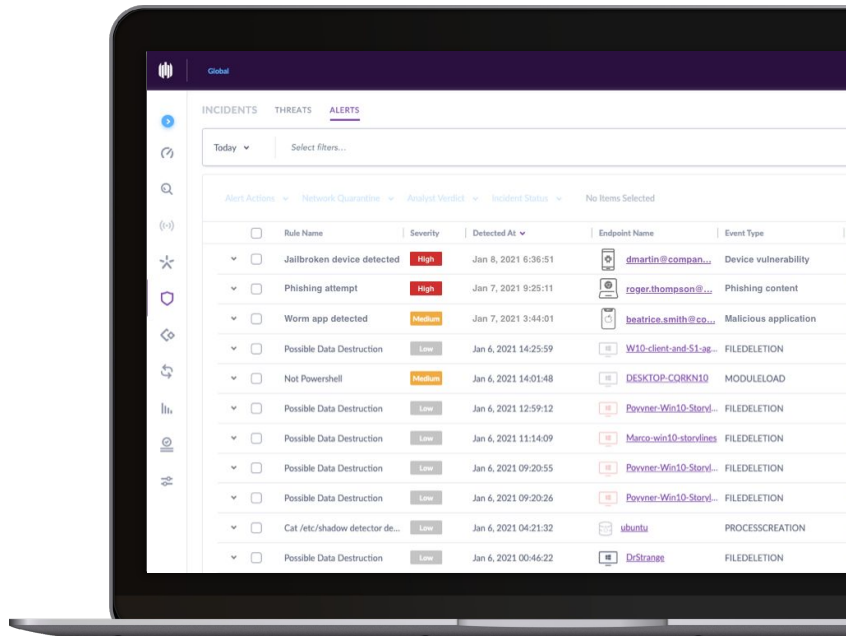

- Alert on 60+ threat and risk detections
- View application inventory with risk scores
- Chrome extension scanner with risk scores

## Response

- Limit or disable network access for devices with active alerts
- SentinelOne extension scanner
- Limit or disable network access for devices with active alerts
- SentinelOne extension for URL filtering

## Strong privacy controls

- GDPR compliant & BYOD safe
- The engine will never collect messages or user content
- Advanced privacy features available
