# Staffing Services

## Expand your skills and abilities.

How does your organization address its growing challenges without overextending staff or hiring new employees unnecessarily? SHI's staffing services are the ideal solution to supplement your existing workforce without overspending. Save time, cut costs, and boost productivity with our staffing services.

### Resource options:

- Temporary
- Temporary to permanent
- Direct hire

## Benefits

### Fast response and dedicated resources

We ensure resources are identified and aligned to your projects and initiatives swiftly, increasing the level of service to your users.

### Single point of contact

We act as the single point of contact to present candidates, answer questions, and assist with setting up interviews and the onboarding process when a candidate is selected.

### Onboarding and offboarding

We conduct drug and background checks, unless you prefer to handle the process. Once the assignment is complete, we notify the candidate and ensure that all items are returned.

### No hidden fees

We search for and suggest candidates to you at no cost. SHI presents candidates' hourly rates and/or desired salaries, along with their resumes, so that all costs are understood prior to setting up interviews.

### Access best talent

SHI can provide your organization with project managers, developers, network engineers, help desk analysts, DBAs, and more. Our professionals will help with your project for as long as you need them. We can deploy additional resources to your site as your requirements evolve and expand over time.

## We find the perfect professionals for your needs by:

- Obtaining a complete understanding of each assignment.
- Developing a thorough search plan including sourcing, internet advertising, our existing network of resources, and engaging one of our qualified partners.
- Conducting a multi-stage screening process of all the candidates.
- Presenting our top candidates to you for review and interview.
