

SHI AI Report Generator

Instant insight. Zero bottlenecks.
Built for every team.

The SHI AI Report Generator transforms how your teams interact with data. With just a simple prompt, users can instantly generate customized, secure, and audit-ready reports in seconds without writing code, formatting spreadsheets, or waiting on IT. It eliminates manual bottlenecks and empowers every team to self-serve, accelerating decision-making across departments. Whether you're in finance, legal, operations, or public sector, it turns raw data into actionable insights tailored to each stakeholder – fast, traceable, and aligned to your business.

Why it matters

- **Reports take extended periods of time and are inconsistent.**
Get executive-ready reports in minutes, not days.
- **Over-reliance on data teams creates bottlenecks and delays.**
Empower every team to self-serve, reducing IT workload and accelerating outcomes.
- **Audit risk from manual documentation.**
Automatically generate traceable, compliance-aligned reports with built-in governance.
- **Siloed data and fragmented tools.**
Unify structured and unstructured data into one intelligent output engine.
- **Generic reports miss the mark.**
Deliver persona-specific insights tailored for executives, analysts, operations, legal, and public sector stakeholders.

Expected outcomes

- Faster time-to-report across departments
- Significant reduction in IT support requests for reporting tasks
- Accelerated decision-making with real-time insights
- Audit-compliance coverage with traceable documentation
- Persona-specific reporting for exec, legal, finance, ops, and public sector teams

Use cases

- Executive dashboards and KPIs
- Compliance and audit reporting
- Post-incident summaries
- Procurement and budget reviews
- Grant reporting and public briefings
- Cross-department performance reviews

SHI AI Report Generator

Instant insight. Zero bottlenecks. Built for every team.

Why SHI

SHI is not just a global IT solutions provider; we are your AI transformation partner. Our AI Lab infrastructure, in partnership with NVIDIA, is purpose-built for enterprise-grade ideation, experimentation, and adoption. This aligns directly with our strategic approach: Imagine, experiment, adopt. We empower organizations to imagine what's possible with AI, experiment in secure, scalable environments designed for rapid prototyping and production rollout, and adopt solutions with confidence – backed by our deep expertise in infrastructure, data governance, and enterprise AI.

Whether you're a CIO seeking strategic clarity or a developer building the next-gen AI app, SHI brings the technical depth and operational rigor needed to succeed. We help you navigate complexity, reduce risk, and unlock real business value.

- Validated by SHI AI & Cyber Labs and proven in real customer environments.
- Operates securely with your data, in your environment – SaaS, on-premises, or hybrid.
- Integrates seamlessly with SHI's broader AI solution catalog – including SHI RAG Studio, Digital AI Ambassador, and Agentic Event Planner.

Get started

Fast value realization: SHI's two-week Lab Accelerator delivers outcomes using your own data. Let's build your first AI-generated report.
