

AI Readiness Assessment

Accelerate your AI journey

At SHI, we believe that every organization can benefit from artificial intelligence (AI), but understanding how to integrate it effectively can be challenging.

Our AI Readiness Assessment is a two-hour engagement led by SHI's Applied AI advisory. This educational and collaborative discussion covers the top four priority areas required for successful AI implementation. During the assessment we will evaluate your current systems and processes, identifying potential gaps and delivering actionable solutions to put you on a clear path to effective AI adoption.

Assessment pillars

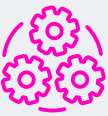

Security

As security threats are rapidly evolving, we discuss potential attack vectors, ensuring your organization is prepared against threats from leveraging AI.

Data

Data is the lifeblood of AI. We make sure that your data is being centralized and governed efficiently to enable feasible AI use cases.

Infrastructure

Infrastructure is the backbone of any AI project. We understand the technology stack to run and operate AI workloads. Validated designs can accelerate your plan.

Business

AI can transform your business. Our assessment can help you establish a tailored vision to harness the benefits of AI while mitigating potential risks.

Our AI Readiness Assessment is the first step towards a more efficient, AI-powered future.

Key benefits

Educate your team:

- Understand security threats that may arise from AI adoption.
- Navigate the infrastructure required to operate AI workloads.
- Evaluate AI literacy and organizational preparedness.

Build a plan:

- Create your infrastructure plan, paving the way for successful AI adoption.
- Align business and data strategies tailored to your business needs.

Kickstart your AI journey. Schedule a call with our experts today to explore what's next.
